FORTY-FIRST

ANNUAL REPORT

OF THE

REGISTRAR-GENERAL

OF

BIRTHS, DEATHS, AND MARRIAGES

IN ENGLAND.

(ABSTRACTS OF 1878.)

Presented to both Houses of Parliament by Command of Her Majesty.

LONDON:
PRINTED BY GEORGE E. EYRE AND WILLIAM SPOTTISWOODE,
PRINTERS TO THE QUEEN'S MOST EXCELLENT MAJESTY.
FOR HER MAJESTY'S STATIONERY OFFICE.

CONTENTS

OF THE

REGISTRAR GENERAL'S ANNUAL REPORT FOR 1878.

REPORT:— PAGES

INTRODUCTION . . . . . v–vi

EMIGRATION and IMMIGRATION . . . . . vi–ix

INCREASE of POPULATION ix

METEOROLOGY at GREENWICH; PRICES of WHEAT and MEAT; NUMBER and VALUE of ANIMALS IMPORTED, and QUANTITY of MEAT IMPORTED; PAUPERISM . . . . . ix–xi

MARRIAGES; Marriage-rate; Number of Marriages celebrated according and *not* according to the Rites of the Established Church; Previous condition of Persons married; Ages of Persons married; Marriages of Minors; Signatures in Marriage Registers; Buildings registered for the Solemnization of Marriages; Certified Places of Worship; Designations of Religious Bodies . . . . . xi–xx

BIRTHS. Number registered; Birth-rate; Sex, Fecundity, Children born out of Wedlock . . . . . xx–xxii

DEATHS. Number registered; General death-rate; Town death-rates; Mortality of Males and Females at various Ages; Mortality of Children under One Year of Age in England and in 20 large Towns. Death-rate of Children under Five Years of Age in 21 large Towns; Seasons; Deaths in Public Institutions in England and in London . . . . . xxiii–xl

PROGRESS of REGISTRATION. Aggregate Number of NAMES on the REGISTERS; NUMBER of SEARCHES in the Registers and of CERTIFICATES granted at the CENTRAL OFFICE . . . . . xl–xli

UNITED KINGDOM. Population, Emigration, Marriage, Birth, and Death Rates xli

THE ARMY. STRENGTH and MORTALITY of the ARMY at HOME and ABROAD . . . . . xli–xlii

THE NAVY. STRENGTH and MORTALITY of the NAVY . . . . xlii–xliii

BIRTHS and DEATHS of BRITISH SUBJECTS at SEA; MARINE REGISTER BOOK; MORTALITY of MERCANTILE MARINE; MORTALITY by DROWNING in the MERCHANT SERVICE compared with that in the ROYAL NAVY . . . . . xliii–xliv

WILLS. Numbers and Values of Probates and Administrations; Calendars of Grants of Probate and Administration kept at the General Register Office . . . . . xliv–xlv

EUROPEAN STATES. Marriage, Birth, and Death Rates . . . xlv–xlvii

METEOROLOGY; Remarks by James Glaisher, Esq., F.R.S. . . . xlviii–li

PRELIMINARY TABLES . . . . . liv–cxxix

ABSTRACTS:—

MARRIAGES Registered in England in each of the Registration Divisions, Counties, and Districts; distinguishing those according and those *not* according to the Rites of the Established Church, and the number in each quarter of the year; distinguishing also the previous Civil Condition of Persons married, Minority, and Signature of the Register by marks 2–25

AGES of Persons married, distinguishing those of Bachelors, Spinsters, Widowers, Widows 26–28

MARRIAGES, BIRTHS, and DEATHS Registered, and Excess of Births over Deaths, in each of the Divisions, Counties, and Districts; also BIRTHS and DEATHS and EXCESS of BIRTHS over DEATHS in each of the Sub-districts of England; distinguishing the Sexes and Illegitimate Births throughout 30–84

ABSTRACTS—*continued.* PAGES

Births Registered in the Divisions and Counties (distinguishing Males and Females) in each of the Four Quarters 86–89

Births of Children born out of Wedlock Registered in the Divisions and Counties (distinguishing Males and Females) in each of the Four Quarters 90–93

Deaths Registered in Divisions and Counties (distinguishing Males and Females) in each of the Four Quarters 94–97

Deaths of Males and Females in Public Institutions 99–120

Deaths of Males and Females at different Ages Registered in Divisions, Counties, and Districts 122–143

Causes of Death of Males and Females in England at different Periods of Life 146–155

Causes of Death of Males and Females in London at different Periods of Life 156–161

Causes of Death of Males and Females in England, and in each of the Divisions and Counties 162–185

Deaths from several Zymotic and other Causes, and Inquest Cases, in the Divisions, Counties, and Districts of England . 186–197

Violent Deaths in England, distinguishing Sex and Age . . . 198–204

Violent Deaths in each of the Eleven Divisions of England, distinguishing Sex 205–211

Deaths returned as having occurred from Suicide in England, distinguishing Sex and Age 212–213

Deaths returned as having occurred from Suicide in each of the Eleven Divisions of England, distinguishing Sex 214, 215

Deaths returned as having occurred from Murder and Infanticide in England, distinguishing Sex and Age 216, 217

Deaths returned as having occurred from Murder and Infanticide in each of the Eleven Divisions of England, distinguishing Sex . . 218

Deaths returned as having occurred from Manslaughter in England, distinguishing Sex and Age 219, 220

Deaths returned as having occurred from Manslaughter in each of the Eleven Divisions of England, distinguishing Sex 221

APPENDIX.

LETTER TO THE REGISTRAR-GENERAL ON THE CAUSES OF DEATH IN ENGLAND, by WILLIAM FARR, Esq., C.B., M.D., F.R.S. :—

Causes of Death:

(1) *Zymotic Diseases*
(2) *Constitutional Diseases*
(3) *Local Diseases* } 225, 226
(4) *Developmental Diseases*
(5) *Violence*

REPORT

TO

The Right Honourable GEORGE SCLATER-BOOTH, M.P., President of the Local Government Board, &c. &c.

General Register Office, Somerset House,
31st March 1880.

(1878.)

SIR,

I HAVE the honour to submit to you the detailed abstracts of the marriages, births, and deaths that were registered in England and Wales during the year 1878.

The country had not recovered from the general depression which began at the close of 1873, and the fall in the marriage-rate in recent years consequently continued; the proportion of marriages of minors has declined since 1873. Comparing the proportion of men and women who now sign the marriage register with marks with the proportion thirty-three years ago, a decrease equal to 50 per cent. is observed. I am therefore able to report that only 15 men and 20 women out of every 100 couples marrying signed with marks in 1878. These proportions will no doubt be much reduced when the scholars receiving instruction under the provisions of the Elementary Education Acts of 1870 and 1876 attain a marriageable age. The number of marriages of divorced persons in 1878 was 107, or 25 more than in the previous year.

The birth-rate was about the average. I have shown that to 1000 married women living at the child-bearing ages there were 302 legitimate births annually in the three years 1875–7; in France the proportion was 196. It is satisfactory to find that to every 100 children born in England less than five were illegitimate: twenty years ago the proportion was 7 per cent.

The death-rate, notwithstanding the high temperature experienced in the summer, and consequent increase in the deaths from certain zymotic diseases, did not exceed the average. Mortality generally increases with density of population; it is gratifying therefore to observe, notwithstanding the increase of population, a reduction in the death-rate of town districts during recent years: the mortality was at the annual rate per 1000 of 24·7 and 24·8 in the two decenniads 1851–60 and 1861–70, whereas in the last eight years 1871–8 the mortality was at the annual rate of 23·6, or 1·2 per 1000 below that in the previous ten years. This implies a saving during the eight years of 16,000 lives annually in the urban registration districts; a reduction is also apparent in the rural registration districts.

I have discussed the subject of town death-rates at some length, and suggested how the mortality statistics of urban and rural *sanitary* districts might be published in a collective form. Such results for purposes

of general investigation and comparison would be of greater practical utility than those published, once in every ten years, for such large areas as superintendent registrars' districts.

The death-rates of children in the various towns afford an interesting subject of observation and inquiry for Medical Officers of Health and other sanitary reformers.

More complete records of immigration are now kept for the United Kingdom, so that it is possible to determine the balance of population more accurately than heretofore.

The abstracts relating to public institutions show that there has been little or no increase in the number of public lunatic asylums in recent years: the proportion of lunatics in all asylums to 1000 of population has, however, gradually increased from 2·03 annually in the five years 1859–63, to 2·72 in the five years 1874–8. This is no doubt partly due to wider recognition of the advantages of asylums.

The alphabetical indexes of marriages, births, and deaths for public use now comprehend more than 59,000,000 names, extending over a period of 41½ years. 27,776 searches were made in 1878, for which and for certificates, fees to the amount of 4,313*l.* 8*s.* 6*d.* were received.

I have given the usual summary of vital statistics for the United Kingdom; the marriage rate of Scotland is lower than that of England, but the Registrar-General of Scotland reports that although the laws which regulate the registration of marriages are not the same there as in England, still a marriage hardly ever escapes registration, and therefore the difference between the respective marriage rates is not owing to defective registration as is the case in Ireland.

The mortality of the Army in 1878 both at home and abroad was below the average of the previous seventeen years.

The death-rate in the Royal Navy from disease was 5·3 per 1000 force; slightly above that in 1877, when the health of the Navy was very satisfactory.

The death-rate of the Mercantile Marine from all causes is double that of the Royal Navy; this is chiefly attributable to the excessive mortality in the former from drowning by shipwreck and otherwise.

The commercial depression of 1878 was felt more or less throughout Europe, and was expressed in a low marriage-rate in each of the European states. Compared with the average rates of the previous five years, it was most depressed in the German Empire; and in Austria, Denmark, Switzerland, and Italy it was more depressed than in England.

I have exhibited some results indicating the relation between the birth-rate and the distribution of the land in France.

The meteorological phenomena of the year 1878 were, in some respects, unfavourable to the public health; the excess in the temperature of the summer months and the severe cold towards the end of the year raised the mortality of those seasons.

The foregoing is a brief summary of some of the subjects discussed more fully in detail in the subsequent pages.

Emigration and Immigration.—Mr. Giffen's report to the Board of Trade relating to the *United Kingdom* shows that although the number of emigrants in 1878 was slightly in excess of that in each of the two preceding years, it was small compared with the number in former years.

The emigrants in 1878, including 32,390 foreigners (after adding a certain proportion of 3064 whose birthplaces were not distinguished) numbered 147,663 against 119,971 in 1877, showing an increase of 27,692. See Table I. For the occupations of emigrants see preliminary table, pp. cvi–cvii.

TABLE I.—EMIGRANTS of VARIOUS NATIONALITIES, 1863–1878.

YEARS.	Of British Origin.				Foreigners.	Not distinguished.	GENERAL TOTAL.
	English.	Scotch.	Irish.	TOTAL.			
1863	61,243	15,230	116,391	192,864	7,833	23,061	223,758
1864	56,618	15,035	115,428	187,081	16,942	4,877	208,900
1865	61,345	12,870	100,676	174,891	28,619	6,291	209,801
1866	58,856	12,307	98,890	170,053	26,691	8,138	204,882
1867	55,494	12,866	88,622	156,982	31,193	7,778	195,953
1868	58,268	14,954	64,965	138,187	51,956	6,182	196,325
1869	90,416	22,559	73,325	186,300	65,752	5,975	258,027
1870	105,293	22,935	74,283	202,511	48,396	6,033	256,940
1871	102,452	19,232	71,067	192,751	53,246	6,438	252,435
1872	118,190	19,541	72,763	210,494	79,023	5,696	295,213
1873	123,343	21,310	83,692	228,345	72,198	10,069	310,612
1874	116,490	20,286	60,496	197,272	38,465	5,277	241,014
1875	84,540	14,686	41,449	140,675	31,347	1,787	173,809
1876	73,396	10,097	25,976	109,469	25,584	3,169	138,222
1877	63,711	8,653	22,831	95,195	21,289	3,487	119,971
1878	72,323	11,087	29,492	112,902	31,697	3,064	147,663

The number of emigrants of *British* origin was 115,273, against 97,967 in the previous year, showing an increase of 17,306 about one half of whom were emigrants to the United States.

Of the 115,273 emigrants of *British* origin, 74,089 or 64 per cent. were English, 11,298, or 10 per cent. were Scottish, and 29,886, or 26 per cent. were Irish. In the number of emigrants of *Irish* origin there was an increase of 6604, or 28 per cent.

The number of British emigrants to the several destinations were in nearly the same relative proportions as in 1877. See Table II.

TABLE II.—AVERAGE ANNUAL NUMBER of EMIGRANTS of BRITISH ORIGIN to each of the under-mentioned PLACES.

PERIOD.	TO UNITED STATES.		TO BRITISH NORTH AMERICA.		TO AUSTRALASIA.		TO ALL OTHER PLACES.		TOTAL.
	Average Annual Number.	Percentage of Total.	Average Annual Number.	Percentage of Total.	Average Annual Number.	Percentage of Total.	Average Annual Number.	Percentage of Total.	
Three years 1853–55	143,606	62	27,856	12	59,876	26	395	—	231,733
Five years 1856–60	74,956	61	7,968	6	37,136	30	3,437	3	123,497
„ 1861–65	93,208	65	9,548	7	37,268	26	3,535	2	143,559
„ 1866–70	133,317	78	16,514	10	16,204	9	4,772	3	170,807
„ 1871–75	134,853	70	22,283	11	27,882	14	8,889	5	193,907
Year 1876 - -	54,554	50	9,335	9	32,196	29	13,384	12	109,469
„ 1877 - -	45,481	48	7,720	8	30,138	32	11,856	12	95,195
„ 1878 - -	54,694	49	10,652	9	36,479	32	11,077	10	112,902

Note.—No correction has been made in the above table for those whose nationality was not distinguished.

Of the 112,902 emigrants of British origin (uncorrected for those whose nationality was not distinguished) 17,449 were under 13 years of

age and 95,453 were aged 13 years and upwards; of this latter number 58,852 were males—of whom 14,868 were married and 43,984 were unmarried—and 36,601 were females, of whom 15,412 were married, and 21,189 were unmarried.

The total number of immigrants in 1878 was 77,951, being 3,897, or 4·8 per cent. below the number in 1877.

TABLE III.—NUMBER of IMMIGRANTS, 1876–1878.

YEARS.	Of British Origin.	Foreigners.	Not distinguished.	TOTAL.
1876 - -	71,404	22,153		93,557
1877 - -	63,890	17,755	203	81,848
1878 - -	54,944	23,007	—	77,951

As regards immigrants of British origin only, the number was 54,944, against 63,890 in the previous year, being a decrease of 8946 or 14 per cent.

TABLE IV.—NUMBER of BRITISH IMMIGRANTS from each of the under-mentioned PLACES.

YEARS.	FROM UNITED STATES.		FROM BRITISH NORTH AMERICA.		FROM AUSTRALASIA.		FROM OTHER PLACES.		TOTAL.
	Number.	Proportion per cent. of Total.	Number.	Proportion per cent. of Total.	Number.	Proportion per cent. of Total.	Number.	Proportion per cent. of Total.	
1876 -	54,697	76	6,629	9	2,579	4	7,499	11	71,404
1877 -	44,878	70	5,687	9	4,637	7	8,688	14	63,890
1878 -	34,040	62	6,204	11	4,207	8	10,493	19	54,944

The excess of emigrants over immigrants of British origin in 1878 was 57,958, against 31,305 in 1877, and 38,065 in 1876.

TABLE V.—EXCESS of EMIGRANTS over IMMIGRANTS of BRITISH ORIGIN, 1876–78.

DESTINATION OR COUNTRY OF DEPARTURE.	Emigrants of British Origin.			Immigrants of British Origin.			Excess or defect of Emigrants.		
	1876.	1877.	1878.	1876.	1877.	1878.	1876.	1877.	1878.
United States - -	54,554	45,481	54,694	54,697	44,878	34,040	−143	603	20,654
British North America	9,335	7,720	10,652	6,629	5,687	6,204	2,706	2,033	4,448
Australasia - -	32,196	30,138	36,479	2,579	4,637	4,207	29,617	25,501	32,272
All other places - -	13,384	11,856	11,077	7,499	8,688	10,493	5,885	3,168	584
TOTAL - -	109,469	95,195	112,902	71,404	63,890	54,944	38,065	31,305	57,958

Note.—The numbers in this Table are uncorrected for those whose nationality was not distinguished.

The number of emigrants to the United States in the years 1876–7 was nearly the same as the number of immigrants therefrom; in the year 1878

the numbers were, emigrants 54,694, immigrants 34,040, the excess of emigrants being 20,654. To British North America the numbers were, emigrants 10,652, immigrants 6204, and the excess of emigrants was 4448. To Australasia the emigrants were 36,479, while the immigrants therefrom were only 4207, showing an excess of 32,272 emigrants.

The above numbers relate to passengers to and from places out of Europe.

Increase of Population.—The numbers of births and deaths registered in the year 1878 were 891,906 and 539,872 respectively; so the natural increase of population was 352,034. The balance of emigrants (deducting immigrants from emigrants of British origin) was 57,958, about 73 per cent., of whom (42,309) were probably of English descent, so the net gain to the population in 1878 was (352,034—42,309) 309,725. The population of England and Wales estimated from the actual rate of increase during the thirty years 1841–71 was 24,700,853 at the end of 1877 and 25,009,867 at the end of 1878; the estimated increase in the twelve months was 309,014, which is almost identical with the number deduced as above.

Meteorology.—The mean reading of the barometer for the year, 29·751 inches, was lower by 0·023 inch than the average of 37 years. In the first quarter of the year the readings, on the whole, were high; during the last three quarters they were below the average. The highest reading at 160 feet above the level of the sea was 30·507 inches on 12th January, and the lowest was 28·857 inches on 26th October, so the range in the year was 1·650 inch.

The mean temperature of the air during the year 1878 at Greenwich was 49°·6, which is 1°·0 above the average of 107 years. The first three months of the year were, with the exception of a cold period from 25th January to 12th February when snow fell generally, and about 12 days in March—exceedingly mild. March terminated and April set in with severe frosts, lasting to 11th April, and then up to the middle of May followed a warm period with the temperature every day in excess of the average; during the remainder of May and until 19th June the temperature was constantly low. There was a week of hot weather at the end of June, the thermometer showing in some places 90° or higher, and again in the middle of July. Three weeks ending 11th September and the first three weeks of October were generally warm and fine, after which a period of cold weather set in, which lasted through November. In December severe winterly weather was experienced, and the mean temperature of the last three months of the year was 2°·0 below the average of 107 years. The average deficiency of temperature for the 65 days ending 25th December was 5°·6; on the 24th December the deficiency was as large as 17½°.

There was a downfall of rain equal to 29·2 inches in 166 out of 365 days. The average rainfall at Greenwich in 63 years was 25·4 inches, so that the amount in 1878 was 3·8 inches in excess of the average. The rainfall in the second or spring quarter was excessive, no less than 13·2 inches being measured, or 7·6 inches above the average.

The wind blew at the mean velocity of 11·2 miles an hour, or 0·4 mile above the average of 30 years 1849–78.

Although the above remarks refer to observations made principally "about London," Mr. Glaisher states that they apply generally to the whole country.

The meteorology of this year, 1878, is fully described on pp. xlix–lii, by Mr. Glaisher, F.R.S., who also shows in his tables the meteorological variations at different places. See pp. xcvi–ci.

Prices.—The commercial and financial history of 1878 was worse than that of any of the previous four years; and prices of commodities, and wages, continued to decline. Among the chief causes which contributed to

the general state of depression were the continued prevalence of strikes in most of the great trades, inactivity in the iron and coal industries, agricultural distress, bank failures, war between Russia and Turkey, and rupture between the Indian Government and the Ameer of Afghanistan.

As the harvest of 1877, *from which the wheat supply of* 1878 *should be derived*, was unsatisfactory, there were large importations in 1878 of foreign wheat, at low prices. The average price of wheat, which was 56*s.* 9*d.* per quarter in 1877, fell to 46*s.* 5*d.* in 1878.

The area under wheat in the United Kingdom* in 1877 was 3,321,065 acres against 3,124,342 acres in 1876, but the average number of acres under wheat in the three years 1876–78 was considerably below the acreage in the several years 1869–75.

The quantity of meat imported in 1878 (1,315,004 cwts.) was slightly in excess of that imported (1,277,686 cwts.) in the previous year. The average price of beef per lb. by the carcase at the Metropolitan Meat Market in 1877 was 6$\frac{3}{8}$*d.*, and of mutton 7*d.*; in 1878 the average prices were the same.

TABLE VI.—QUANTITY of MEAT IMPORTED in the Eight Years, 1871–8.

——	1871.	1872.	1873.	1874.	1875.	1876.	1877.	1878.
Beef, Salted or Fresh	Cwts. 302,079	Cwts. 228,912	Cwts. 260,554	Cwts. 261,721	Cwts. 215,581	Cwts. 413,351	Cwts. 678,505	Cwts. 729,123
Meat „ „ -	42,340	55,354	79,841	119,403	144,954	92,556	130,178	145,981
Total -	344,419	284,266	340,395	381,124	360,535	505,907	808,683	875,104
Meat, Preserved otherwise than by salting -	254,833	350,729	260,749	265,223	171,373	283,066	469,003	439,900

NOTE.—The figures in this Table, excepting for Sheep and Lambs, are derived from the Monthly Return of "Trade and Navigation of the United Kingdom," compiled by the Board of Trade, as the "Statistical Abstract" does not distinguish the several kinds of cattle or give the number of Swine.

* Including, for this purpose, the islands in the British Seas.

The price of oxen and bulls rose from 21*l.* 16*s.* to 22*l.* 12*s.*, of calves from 4*l.* 6*s.* to 4*l.* 18*s.*; sheep and lambs were of about the same value in the two years, viz., 2*l.* 8*s.*; and swine decreased in value from 4*l.* 8*s.* to 3*l.* 12*s.*, and cows from 17*l.* 10*s.* to 16*l.* 16*s.*

Potatoes were dear in 1877, the mean price for the best quality at the waterside market in Southwark being 146*s.* per ton, but in 1878 they rose to 156*s.* 6*d.* per ton.

Pauperism.—The average number of paupers (returned on the last day of each week) in each of the years 1877 and 1878 was—in-door 146,851 and 154,961—out-door 519,506 and 527,986, showing an increase in the number both of in-door and out-door paupers relieved.

Marriages.

The unfavourable commercial and financial history of 1878 has already been noticed. The continued depression of trade and industry caused a further decline in the marriage-rate (persons married to 1000 persons living) which was 15·3, a rate below that of any year since 1842 and 1843, when the rates were 14·7 and 15·2 per 1000 respectively. The average annual rate in the ten years 1868–77 was 16·6, so the marriage-rate in 1878 was 1·3 per 1000 below this average.

The marriage-rates in three years of high prices and high wages and in five years of lower prices and lower wages are appended:—

Years.	Marriage-rate.	Increase or Decrease per cent. from year to year.
1871	16·7	—
1872	17·5	+4·79
1873	17·6	+0·57
1874	17·1	−2·84
1875	16·8	−1·75
1876	16·7	−0·60
1877	15·8	−5·39
1878	15·3	−3·16

The decrease in the marriage-rate in 1878 was general throughout England, but was most marked in the mining and manufacturing counties of Monmouth, Durham, Northumberland, Stafford, York, South Wales, and Nottingham (counties where the rate is nearly always high), and in the corn-growing and grazing counties of Cambridge, Huntingdon, Salop, Leicester, Gloucester, and Oxford. This may be seen on reference to Table 9, p. lxii., where the marriage-rate in 1878 is contrasted with the average annual rate in the previous ten years. The decrease in the rate in the counties of Monmouth, Durham, and Northumberland amounted to no less than 27, 23, and 21 per cent. respectively.

Some of the chief causes which contributed to the fluctuation in the marriage-rate in England and Wales during the forty years 1839–78 are shown in Table 69. The quantities of imported wheat retained during this period in the United Kingdom for home consumption are there shown, together with the value of imports and exports.

The value of *imports*, which was almost stationary in the seven years 1864–70 increased from 303,257,493*l.* or 9*l.* 14*s.* 1*d.* per head of population in 1870, to 394,419,682*l.* or 11*l.* 15*s.* 10*d.* per head in 1877. In

1878 the value fell to 368,770,742*l.* or 10*l.* 18*s.* 3*d.* per head of population. On the other hand the value of the *exports* of British and Irish produce attained a maximum in 1872 of 256,257,347*l.* or 8*l.* 1*s.* per head of population: since 1872 their value has gradually declined, and, in 1878, it fell to 192,848,914*l.*, representing only 5*l.* 14*s.* 1*d.* per head of population, a result probably due partly to a falling off in the demand for British produce and manufactures, and partly to the decrease in the value of goods exported.

These figures reflect the general industrial depression, and consequent closing of factories, mines, &c., which necessitated a reduction in the number of hands employed and a more economic habit of living on the part of many connected with such concerns; and as men do not generally choose to marry in a period of reduced or uncertain incomes, but wait for more prosperous times, there is ample reason for the decrease that has taken place in the marriage-rate during the last five years.

Forms of Marriage.—190,054 marriages were celebrated during the year 1878; 137,969, or 72·6 per cent., according to the rites of the Established Church, and 52,085, or 27·4 per cent., otherwise.

Of the former, 28, or ·02 per cent., were by special license; 15,498, or 11·29 per cent., by license; 118,414, or 86·22 per cent., after banns; and 3,389, or 2·47 per cent., by Superintendent Registrar's certificate. The particular form of marriage was not specified in 640 instances.

In the English Church for some reason or other opinion has, since 1861, set in favour of marriage after the proclamation by banns of the names of bride and bridegroom in the face of the congregation. The subjoined table shows the proportions of marriages of the Established Church according to the forms of license, banns, and Superintendent Registrar's certificate at different periods. Thus, the number of marriages by license increased from 15 per cent. in the five years 1841–5 to 16 per cent. in the five years 1856–60, and then gradually fell off to 11 per cent. in the year 1878. The number of marriages after banns declined from 83 per cent. in 1841–5 to 81 per cent. in 1856–60, after which period the number gradually increased, until in 1878 the proportion per cent. reached 86.

TABLE VIII.—OF the MARRIAGES CELEBRATED in the ESTABLISHED CHURCH, the PROPORTION PER CENT. by SPECIAL LICENSE, LICENSE, BANNS, and by SUPERINTENDENT REGISTRAR'S CERTIFICATE, 1841–78.

PERIODS OF FIVE YEARS.	PROPORTIONAL NUMBERS of MARRIAGES according to the RITES OF THE ESTABLISHED CHURCH.*				
	Total.	Special License.	License.	Banns.	Superintendent Registrar's Certificate.
1841–45 - -	100	·01	15·42	83·28	1·29
1846–50 - -	100	·01	15·47	82·39	2·13
1851–55 - -	100	·01	15·58	81·53	2·88
1856–60 - -	100	·01	16·01	80·88	3·10
1861–65 - -	100	·01	14·93	81·94	3·12
1866–70 - -	100	·01	13·56	83·43	3·00

„ 1877 - -	100	·01	11·55	85·96	2·48
„ 1878 - -	100	·02	11·29	86·22	2·47

* The Church marriages not otherwise described have been proportionally distributed over the headings "Special License," "License," &c.

It is to be regretted that some of the clergy still omit to insert in the marriage register the words "by license," &c., thus rendering the returns incomplete: the 640 instances of this kind in 1878 were equal to ·46 per cent., which shows little or no improvement on the proportions of the last few years. The following are the proportions per 1000 Church marriages from 1841:

Years.	Mean Annual Number.
In the five years 1841–45	159
" " 1846–50	122
" " 1851–55	41
" " 1856–60	29
" " 1861–65	25
" " 1866–70	20
" " 1871–75	7
Year 1876	4·7
" 1877	4·8
" 1878	4·6

Although the proportional number of cases was nearly the same in each of the years 1876, 1877, and 1878, the results in the annexed table show that the proportions varied considerably in the different Registration Divisions in the three years.

TABLE IX.—PROPORTION of MARRIAGES in the ESTABLISHED CHURCH not described whether by LICENSE, by BANNS, or by SUPERINTENDENT REGISTRAR'S CERTIFICATE.

REGISTRATION DIVISIONS.	Proportions in 1000 Church Marriages.		
	1876.	**1877.**	**1878.**
ENGLAND	4·69	4·79	4·64
London	1·15	0·73	0·49
South-Eastern Counties	8·14	11·16	10·45
South Midland Counties	9·71	10·17	13·92
Eastern Counties	13·83	10·11	11·70
South Western Counties	10·98	11·38	8·74
West Midland Counties	5·38	6·08	4·16
North Midland Counties	4·22	4·48	5·17
North Western Counties	0·68	1·00	1·29
Yorkshire	3·38	3·00	2·66
Northern Counties	3·71	3·63	1·29
Monmouthshire and Wales	7·59	5·70	8·75

Of the 52,085 marriages not according to the rites of the Establishment, 7,980, or 15·32 per cent., were solemnized in the registered places of Roman Catholics, and 21,484, or 41·25 per cent., in those of other principal Christian denominations, while 22,056, or 42·34 per cent., took

place in the offices of Superintendent Registrars without any religious rite. Sixty, or ·12 per cent., were celebrated according to Quaker rites, and 505, or ·97 per cent., were marriages of Jews.

First Marriages; Re-marriages.—Of the 380,108 persons married in 1878, 164,265 were bachelors, 171,474 were spinsters, 25,789 were widowers, and 18,580 were widows; so of 100 men married 13·6 and of 100 women 9·8 had been previously married.

Of the bachelors, 156,037 married spinsters, and the remaining 8,228 married widows.

Of the spinsters, 156,037 were married to bachelors and the remaining 15,437 to widowers.

Of the 25,789 widowers who re-married, 15,437 wedded spinsters, and 10,352 wedded widows; and of the 18,580 widows, 10,352 were re-married to widowers and 8228 to bachelors.

Table 10 of the preliminary Tables shows the proportional number of re-marriages of widowers and widows in each county.

The number of marriages of divorced persons in 1878 was 107, or 25 more than in 1877. Of 57 divorced men who re-married, 43 married spinsters, and 12 married widows. Of 52 divorced women re-married, 32 were married to bachelors, and 18 to widowers. There were two marriages in which both the bride and bridegroom had been previously divorced.*

Ages at Marriage.—Of the 190,054 couples who married in 1878 the ages of *both* parties were recorded in 149,897 cases, so that in no fewer than 40,157 instances the precise ages were not returned by the officiating Minister, or by the Registrar of Marriages; 21·1 per cent., therefore, of the returns were imperfect in this respect, a result which shows very little improvement on that (21·6) of the previous year.

The gradual improvement which has taken place in England during the last 21 years is shown in the subjoined Table:—

TABLE X.—PROPORTION PER CENT. in which the AGES of BOTH PARTIES were not RETURNED in the MARRIAGE REGISTER in ENGLAND, 1858–78.

YEARS.	To every 100 Marriages the number of cases in which the ages of both parties were not returned.	YEARS.	To every 100 Marriages the number of cases in which the ages of both parties were not returned.
1858	40·6	1868	33·0
1859	38·9	1869	31·2
1860	37·5	1870	30·1
1861	36·7	1871	29·0
1862	36·4	1872	27·7
1863	35·3	1873	27·0
1864	34·9	1874	25·8
1865	35·1	1875	23·7
1866	33·6	1876	22·8
1867	33·5	1877	21·6
		1878	21·1

* The number of decrees of divorce pronounced by Her Majesty's Court for Divorce and Matrimonial Causes in the year ending 31st October 1878 was, *nisi* 496, absolute 292.

As will be observed in Table XI. the proportions vary in different parts of the country; thus in Yorkshire only 8·7 and in the Northern counties 9·7 per cent. of the returns were incomplete as to age, whereas to every 100 marriages in the South Midland counties the number of cases in which the ages of both parties were not returned was 26·4; but the returns were most imperfect in London where the proportion was 39·5 per cent.

TABLE XI.—PROPORTION PER CENT. in which the AGES of BOTH PARTIES were not RETURNED in the MARRIAGE REGISTER, in each REGISTRATION DIVISION in 1877 and 1878.

REGISTRATION DIVISIONS.	To every 100 Marriages the number of cases in which the ages of both parties were not returned.		REGISTRATION DIVISIONS.	To every 100 Marriages the number of cases in which the ages of both parties were not returned.	
	1877.	1878.		1877.	1878.
Yorkshire - - -	8·7	8·7	Eastern Counties - -	24·2	23·4
Northern Counties - -	9·9	9·7	South Eastern Counties -	24·8	24·2
North Western Counties -	15·2	13·2	South Western Counties -	25·3	24·7
Monmouthshire and Wales	13·9	13·6	South Midland Counties -	27·1	26·4
West Midland Counties -	17·9	18·5	London - - - -	40·4	39·5
North Midland Counties -	21·5	21·0			

I should be glad if the clergy, at the time of registering the marriage, would state that it is of considerable importance, not only to the parties themselves that their precise ages should be returned either for tracing pedigree or for proof of personal identification in establishing title to property—but that such particulars would also enhance the value of these national records for purposes of statistical investigation.

The mean age at marriage as determined from the 149,897 couples whose ages were stated in the year 1878, including the re-married, was 27·9 years for men, and 25·8 for women. For 131,212 bachelors it was 25·8 years, and for 136,179 spinsters 24·4 years. The mean age at marriage of 18,685 widowers was 43·1 years, and of 13,718 widows 39·6 years. These mean ages are almost exactly the same as those of ten years ago.

Minors.—The numbers of men and women under 21 years of age who married in 1878 were 14,785 and 41,062 respectively; so that of every 100 men married 7·78 were not of full age, and of every 100 women married 21·61 were not of full age.

The increasing tendency to early marriage (indicated by the proportional number of minors married) received a check in 1875. From 1848 to 1874* the proportion had gradually increased, but the stagnation in trade, and consequent reduction in the prices of labour in recent years caused even young people to take a less cheerful view of their prospects; accordingly the proportional number of minors of both sexes to 100 couples fell from 15·54 in 1874, to 14·70 in 1878, a reduction equal to 5·4 per cent.

* See preliminary Table No. 8.

TABLE XII.—PROPORTIONS per Cent. of MINORS who MARRIED, 1841–78.

PERIODS of Five Years.	To every 100 Marriages the proportion of Males and Females under 21 Years of Age.		
	Males.	Females.	Mean.
1841–45	4·38	13·35	8·86
1846–50	4·48	14·23	9·36
1851–55	5·45	17·28	11·37
1856–60	5·94	18·65	12·30
1861–65	6·55	19·87	13·21
1866–70	7·08	20·84	13·96
1871–75	8·15	22·22	15·19
Year 1876	8·25	21·99	15·12
„ 1877	8·11	22·02	15·07
„ 1878	7·78	21·61	14·70

The counties showing the greatest proportional decrease are Monmouthshire, Shropshire, Northumberland, Cambridgeshire, South Wales, Cumberland, Herefordshire, Cheshire, Worcestershire, Leicestershire, Derbyshire, West Riding of Yorkshire, Staffordshire, and Cornwall. In London and in certain counties there was an increase.

Signature in Marriage Registers.—The result of the efforts made during the last quarter of a century to provide for the better education of the people is reflected, year by year, in the diminution of the number of persons who sign the marriage register with marks. Of the 65,334 persons who, in the year 1878, signed this document with marks, 27,740 were men, and 37,594 were women ; of 100 men married 85, whereas of 100 women married only 80, were able to write their names.

Table XIII. shows the improvement that has been effected during the last thirty-eight years.

TABLE XIII.—SIGNATURE of the MARRIAGE REGISTER by MARKS, 1841–78.

PERIODS of Five Years.	To every 100 Marriages the proportion of Men and Women who signed the Marriage Register with Marks.		Quinquennial Decrease in the proportions who signed with Marks.	
	Men.	Women.	Men.	Women.
1841–45	32·6	48·9	1·2	2·7
1846–50	31·4	46·2	1·2	2·7

1866–70	20·5	28·3	2·0	3·1
1871–75	18·5	25·2	—	—
Decrease in the 35 years 1841–75			15·5	25·6
Year 1876	16·3	22·1	—	—
„ 1877	15·3	20·9	—	—
„ 1878	14·6	19·8	—	—

In 13,965 instances in 1878 *both* the husband and the wife were unable to write their names, and in 37,404 cases either the husband or the wife signed with marks. Of 100 marriages thirty-one years ago (1847) there were 24 in which both husband and wife signed with marks, now (1878) the proportional number is only 7.

Table XIV. shows the state of elementary education, as indicated by the proportional number of men and women who signed the marriage register with marks, in the different divisions of the United Kingdom for the most recent years for which the abstracts are available.

TABLE XIV.—SIGNATURE of the MARRIAGE REGISTER by MARKS in different DIVISIONS of the UNITED KINGDOM.

——	Years.	To every 100 Marriages the proportion of Men and Women who signed the Marriage Register with Marks.	
		Men.	Women.
ENGLAND AND WALES - -	1877	15·3	20·9
	1878	14·6	19·8
SCOTLAND - - - -	1874	9·1	18·0
	1875	8·6	16·9
IRELAND - - - -	1877	30·4	36·0
	1878	28·5	33·7

The annexed table shows the mean proportion of men and of women who signed with marks to every 100 marriages, in the several counties of England, in each of the periods of five years 1841–5 and 1874–8.

These proportions show that the elementary education of the people has made considerable progress during the last thirty-three years, reckoning from the middle of the first period to that of the second period.

The counties are arranged in the order of education of *men*, and it will be observed that in no county are as many men able to write as in Westmorland where the per-centage of those who make use of marks instead of writing their names is only 7·4. London (8·0) and the counties of Surrey extra-metropolitan (10·8), Middlesex extra-metropolitan (11·0), Hants (11·7), Northumberland (12·0), Devon (12·3), East Riding of York (12·4), Cumberland (13·0), and Sussex (14·0), contrast favourably with the rest.

The counties showing the greatest educational deficiency are Worcestershire (28·4), Monmouthshire (28·3), Suffolk (25·5), Bedfordshire (24·8), Hertfordshire (24·7), Norfolk (23·8), Cambridgeshire (23·5), and North and South Wales (23·6 and 22·7).

The counties in which the greatest progress (represented by the greatest proportional decrease in the per-centage of men who signed with marks) has been made in the thirty-three years are not always those where there was most room for improvement; thus the decrease per cent. was greatest among men in Surrey extra-metropolitan (69·8), Middlesex (65·8), Westmorland (62·2), Hants (62·0), and Essex (60·8), and least in Cumberland (19·8), Durham (20·6), North Riding of York (30·1), and London (32·2).

As regards the education of *women*, South Wales, where the proportion who signed with marks was 36·8 per cent. is most benighted, then follow Worcestershire (35·0), Lancashire (32·2), Monmouthshire (32·0), North Wales (31·4), Bedfordshire (30·6), Durham (30·0), and the West Riding of Yorkshire (29·7). It is, however, gratifying to observe that the

proportional decrease in the per-centage of women who signed with marks has been during the thirty-three years as high as 77·4 per cent. in Surrey (extra-metropolitan), 77·1 in Sussex, 74·6 in Wiltshire, 73·8 in Essex, 73·2 in Berkshire, 73·1 in Middlesex (extra-metropolitan), and 72·3 in Hampshire.

TABLE XV.—PROGRESS of ELEMENTARY EDUCATION in the several COUNTIES of ENGLAND as indicated by the DECREASE in the NUMBER of PERSONS who SIGN the MARRIAGE REGISTER with MARKS. (Counties arranged in the order of the Education of Men in the Period 1874–78.)

REGISTRATION COUNTIES.	MEN. Of 100 Men married the proportion who signed with Marks.			WOMEN. Of 100 Women married the proportion who signed with Marks.

Although as a rule elementary education is more neglected among women than men, this is not the case in some counties, for the education of women, judged by this test, is not so deficient as that of men in Surrey (extra-metropolitan), Middlesex (extra-metropolitan), Hants, Sussex, Kent (extra-metropolitan), Lincoln, Berks, Rutland, Oxford, Wilts, Dorset, Essex, Somerset, Hereford, Hunts, Bucks, Cambridge, Norfolk, Hertford, and Suffolk. The disparity in the educational abilities of the two sexes is striking in Durham, Lancashire, Nottinghamshire, Suffolk, Yorkshire, and Wales. In Westmorland, Hampshire, and the home counties, however, the education of both sexes is fairly advanced.

Up to 31st August 1878 provision had been made in England and Wales for the attendance, in 16,293 schools receiving annual Government grants, of 3,942,337 scholars. In the year 1868 accommodation was provided for only 1,663,043 children, so that additional provision has been made during the ten years for 2,279,294 scholars. This increase, however, is still below what is necessary. On the day of inspection 2,944,127 scholars were present, and the average daily attendance was 2,405,197, being 30 per cent. below the number, which it is estimated, should be under daily instruction in efficient schools. 3,495,892 scholars were on the registers, of whom 1,189,557 were under seven years of age, 2,158,179 were aged seven and under 13 years, and 148,156 were aged 13 years and upwards.

In London the average number of scholars on the roll during the six months ending Christmas 1878 was 444,322, the average daily attendance being 350,507. This is about double the number in the year 1871, before the School Board established their first school, when the registered number at efficient schools was only 222,518, and the average daily attendance was 174,301.

And, looking at the spread of elementary education as evidenced by the constantly decreasing number of men and women failing to write their names in the marriage register, the country is to be congratulated on the success attending its efforts in this direction, which will doubtless be shown in a more striking manner when the children now receiving education at Board and other schools become men and women.

Buildings registered for the solemnization of Marriages.—The number of these buildings on the register on the 31st of December 1878 was 8,251 showing an increase of 200 during the year, to which number the Presbyterians of all descriptions contributed 5, the Independents 31, the Baptists 23, the Roman Catholics 7, the Unitarians 4, the various sects of Wesleyan Methodists 113, the Calvinistic Methodists 13, the New Jerusalem Church 2, and other religious denominations 2.

Certified Places of Meeting for Religious Worship.—The number of certified places of meeting for religious worship on the register on the 31st of December 1878 was 19,977, showing an increase of 431 during the year. The following is a list of the descriptions of the congregations on whose behalf places have been certified. Those printed in italics have been added since the publication of the list in the last Report :—

Adventists.
Apostolics.
Armenian New Society.

Baptists, different sects of; viz.:
- Baptists.
- Calvinistic Baptists.
- General Baptist New Connexion.
- General Baptists.
- Old Baptists.
- Particular Baptists.
- Presbyterian Baptists.
- Scotch Baptists.
- Seventh Day Baptists.

Baptists, different sects—*cont.*
- Strict Baptists.
- Union Baptists.
- Unitarian Baptists.

- Wesleyan Reformers.
- Wesleyan Reform Glory Band.
- Wesleyans.

Working Man's Evangelistic Mission Chapels.

Births.

Although the births in the year 1878 were more numerous than in any previous year, the number (891,906) was only 3,706 in excess of that registered in 1877. The birth-rate was 35·9 per 1000, nearly the same as the average annual rate in the previous ten years, but below the rates in 1876 and 1877, which were respectively 36·6 and 36·2. Considering the depression in the marriage-rate in recent years the birth-rate has been well maintained; indeed the rate in 1878 though below the respective rates in 1876 and 1877, was higher than it was in any year previously to 1876 excepting 1874.

The birth-rate varies in different localities, owing chiefly—as has been shown in previous reports—to difference in local industries. The rate of 1878, compared with the average of the previous ten years, was high in London 36·3, in the county of Northampton 35·9, in Essex 35·5, Norfolk 31·4, Wilts 31·5, Warwick 39·4, Leiceister 40·1, Rutland 31·9, Lincoln 34·0, Nottingham 41·0, Derby 41·1, Lancaster 41·2, East and North Ridings of York 38·3 and 36·6, Cumberland 37·3, Westmorland 30·4, and in North Wales 32·1.

The lowest rates in 1878 were generally in those counties where there is a comparatively low proportion of married women at the child-bearing ages, viz., Cornwall 27·5, Surrey (extra-metropolitan) 28·7, Hereford 28·8, Dorset 28·9, Devon 29·5, &c. Table XVI., shows how much the *general* birth-rate in each county in the ten years 1868–77 was affected by the proportion of *married* women aged 20–40 living in the several counties.

TABLE XVI.—NUMBER of MARRIED WOMEN aged 20–40 Years, to every 100 WOMEN at the same AGE living in 1871, and the AVERAGE ANNUAL NUMBER of BIRTHS to 1000 PERSONS living in the 10 Years 1868–77 in the several COUNTIES of ENGLAND.

Sex.—455,048 boys and 436,858 girls were born in 1878, so 1042 boys were born to every 1000 girls. The proportions differ in the several counties, and range from 953 in Westmorland, 997 in Northampton, and 1015 in Middlesex (extra-metropolitan), to 1074 in Norfolk, 1075 in Lincoln, and 1090 in Hertford. As shown in the last report—the excess in the proportional number of boys born to 1000 girls born in England and Wales has declined from 1050 in the ten years 1838–47 to 1039 in the ten years 1868–77.

Fecundity.—The annual number of legitimate births, in the three years 1875–7 to 1000 married women estimated to be living, aged 15 and under 45, was 302. In France the proportional number in the same period was 196.

Some remarks on the proportional number of births to married women at the child-bearing ages, in France, will be found on pp. xlvi–viii.

Children born out of wedlock.—The proportion of women bearing illegitimate children to the total female population of the child-bearing ages is comparatively small. Thus the births registered as illegitimate amounted to 42,100, being in the proportion of 4·7 to every 100 children born. Though this is the same proportion as that in the previous year, it is considerably lower than the average (5·8) in the 24 years 1855–78.

As shown in previous reports, high or low rates of illegitimacy may to some extent be explained by large or small proportions of spinsters aged 20–40 in the female population; thus it will be seen by the subjoined table, that in the counties of Hereford, Westmorland, Cumberland, and Salop, where the illegitimate births equalled from 7 to 8 per cent. of the total births, the spinsters aged 20–40 formed upwards of 40 per cent. of the female population.

TABLE XVII.—PROPORTION of ILLEGITIMATE CHILDREN to every 100 BIRTHS in the several COUNTIES of ENGLAND and WALES in the 10 years 1855–64 and 1865–74, and in the 4 years 1875–8.

[Counties arranged according to rates prevailing in 1875–8.]

Deaths.

In 1878, the deaths registered in England were 539,872; they were 39,376 above the number registered in the previous year. Forty years ago the deaths numbered a third of a million, they now exceed half a million annually.

The rate of mortality in 1878 was 21·7 per 1000; it was in excess of that of 1877, but identical with the annual average in the eight years 1871–78. Compared with the numbers in the previous year, the deaths in 1878 from small-pox were less than half; the deaths from measles were also fewer, but the deaths from scarlet fever, diphtheria, whooping-cough, and fever were more numerous: some high temperatures in the summer raised the mortality considerably from infantile diarrhœa.

The diseases which prevailed and the fatality of the various causes are shown in Dr. Farr's letter at pp. 225–6 in the Appendix.

Town death-rates.—The annexed table (XVIII.) shows the annual rate of mortality in the urban and rural registration districts since 1847.

The average annual death-rate in the urban districts in the ten years 1851–60 was 24·7, in the next ten years it was nearly the same, 24·8. When it is borne in mind that increased density of population ordinarily has the effect of raising the death-rate, and that there has been a constant tendency towards increased density, these results indicate that the laws affecting the public health have been administered with success; this is more apparent in the mean annual death-rate of these urban districts in the succeeding eight years 1871–8, which was 23·6.

In the rural registration districts there has also been improvement, but not to the same extent.

Similar powers to those in force for urban populations are—from time to time—conferred upon rural authorities for purposes of sanitary administration; but it is questionable whether there should be any difference in the sanitary regulations governing urban and rural districts. Town populations are rapidly increasing, and equivalent sanitary arrangements are requisite; but as preventive are better than remedial measures, the laws affecting the public health should not be relaxed outside the town areas, and it is well known that many sanitary defects exist in our villages generally, especially with regard to water supply and drainage; the cottages of the labouring population also require much improvement.

TABLE XVIII.—ANNUAL RATE OF MORTALITY per 1000 in the TOWN and COUNTRY DISTRICTS of ENGLAND AND WALES in the 32 Years 1847–78.

YEAR.	DENSITY of Population in England and Wales.	ANNUAL RATE OF MORTALITY per 1000 persons living in

How best to promote the health of our town populations is one of the leading questions of the day. Previously to the Royal Commission appointed in 1844 to inquire into the sanitary condition of large towns and populous districts, the subject had not attracted the attention it deserved, but from that time its importance became more evident, and in 1848 an Act (11 & 12 Vict. c. 63) was passed for the object of improving the sanitary condition of towns and populous places; the Act provided for the constitution of Local Board districts and a central Office to be called the "General Board of Health." The Board was to be continued only for five years, but the period was extended from time to time until 1858, when the powers of the General Board of Health were transferred to a Department of the Privy Council, presided over by a Medical Officer, to advise and report on the health requirements of the population, whose appointment had been previously provided for by an Act passed in 1855.

By the Local Government Board Act of 1871, the administration of Local Government and Sanitary Improvements, the powers and duties of the Medical Department of the Privy Council, and the business of the Poor Law Board were transferred to the Local Government Board, but the year 1872, when the Public Health Act was passed, may be said to be the commencement of a new era in the promotion of public Health. The Act provided that the country should be divided into "urban" and "rural" sanitary districts, each to be provided with a medical officer of health, so that local sanitary authorities are now held responsible for the health of the communities under their charge. The Act has only been in operation six years and therefore there has barely been time to fully develop its administrative machinery, but nevertheless its successful working can be traced in the improved sanitation of the country. The Acts relating to the Public Health in England were consolidated and amended by the Public Health Act of 1875.

Previously to 1865 death-rates were published by the Registrar-General *annually* for no smaller areas than counties, but these results, for purposes of statistical and sanitary investigation, were not sufficiently localized, and in that year was commenced the publication of the mortality of the largest towns; the list of towns has since then been greatly extended.

The death-rates were also computed every *ten years* for each Superintendent Registrar's district, but in reviewing the comparative salubrity of different localities the area which these districts embrace is found to be too extensive for practical use, some of them comprising fourteen or more sanitary jurisdictions varying materially in character and density—some healthy, some unhealthy, some urban, some rural. Thus, therefore, the Superintendent Registrars' districts or Poor Law Unions, which are well adapted for other purposes, are no longer used for local administration of the laws relating to public health; the urban and rural sanitary districts, which comprise smaller areas, are better suited for this purpose.

TABLE XIX.—NUMBER of SANITARY JURISDICTIONS in ENGLAND and WALES on 31st December 1878, exclusive of the Metropolitan Districts.

REGISTRATION COUNTIES.	Area of Registration Counties in Statute Acres.	Estimated Population of Registration Counties in the middle of 1878.	Sanitary Districts.			Nature of the Urban Districts.

ENGLAND & WALES, exclusive of London	37,243,859	21,277,093	1539	584	955	225	678	52

Seeing therefore that the sanitary district has become the recognised unit of local sanitary government, some scheme to digest national health statistics on this basis and on a plan commensurate with the importance of the subject would be of great practical value.

The causes of insalubrity that may be at work in any of the sanitary districts are now promptly discovered by medical observers and other authorities watching over these areas, acting in concert with the Medical Department of the Local Government Board, by whom the laws affecting the public health are administered.

On the last day of 1878 there were, exclusive of London, 1539 sanitary districts in England and Wales, of which 584 were rural and 955 urban. Of the 955 urban sanitary districts, 225 were boroughs, 678 local government districts, and 52 improvement Commissioners' districts. The correct population of all these will be known in 1881.

It would probably be sufficient at first to publish the following ten results, annually, for each of the urban districts: (1) the estimated population, (2) total births, (3) deaths from all causes, (4) deaths of infants under one year of age, (5) deaths from the seven principal zymotic diseases, and from each of the seven, (6) the birth-rate, (7) the death-rate from all causes, (8) the death-rate from the seven principal zymotic diseases, (9) the proportion of deaths from the seven principal zymotic diseases to 100 deaths from all causes, and (10) the proportion of deaths of infants under one year of age to 1000 births.

(*Example.*)

TABLE XX.—MORTALITY STATISTICS of URBAN SANITARY DISTRICTS in the Year 1878.

Urban Sanitary Districts.	Estimated Population in the middle of the Year 1878.	Total Births.	Total Deaths.	Deaths of Infants under One Year of Age.	Deaths from the Seven principal Zymotic Diseases.								Annual Birth-rate to 1000 Persons living.	Annual Rate of Mortality per 1000 Persons living.		Proportion of Deaths from the Seven principal Zymotic Dis. to 100 Deaths from all Causes.	Deaths of Infants under One Year of Age to 1000 Births.
					Total from the Seven.	Small-pox.	Measles.	Scarlet Fever.	Diphtheria.	Whooping-cough.	Fever.	Diarrhœa.		From all Causes.	From Seven principal Zymotic Diseases.		
Dover -	32,430	1089	528	132	51	-	1	3	2	16	3	26	33·6	16·3	1·6	9·7	121

On the next two pages is another example, viz., a similar series of facts for London extending over a long term of years, and such a comparative table might be constructed for each of the sanitary districts (now represented by 29 registration districts) presided over by 47 Metropolitan Medical Officers of Health, in order to show the improvements that have been effected in different parts of London.

Table XXI.—LONDON.

were not included until 1847; thus the figures in the above Table do not relate to the same area
Births and Deaths.
weeks, and the proportions are calculated on the deaths registered in the same time. All the figures for

years and also for years represented by 52 or 53 weeks.

To enable this information to be prepared, it would be necessary for the Registrars, in making out their usual quarterly returns, to furnish a summary of the results relating to each sanitary jurisdiction in their sub-districts, the detailed particulars of which they already supply periodically to the Medical Officers of Health.

Or, if the Registrars were instructed to distinguish in the first column of the death register (where the sanitary districts comprise parts of parishes or townships) the name of the urban district in which the death occurred, then the causes of death and the ages, together with some additional particulars, could be accurately abstracted at the Central Office for each of the sanitary districts of England.

The annual reports of the Medical Officers of Health often furnish the requisite results, and if these were uniform, the necessary particulars could perhaps be extracted and shown collectively for the sanitary jurisdictions, on the same principle as has been adopted for the causes of death of children under one year of age in certain large towns. *See* Appendix, p. 258, Table 29.

As regards rural sanitary districts, it is of almost equal importance that these should have the advantage of similar investigation, for as I have remarked earlier in this report our villages and outlying portions of towns stand in great need of sanitary supervision, and the publication of such figures as are here suggested could not fail to draw attention to so important a question.

The subjoined table shows the mortality from all causes in the twenty largest towns during the ten years 1868–77 and in the year 1878. For details relating to the mortality from seven of the principal zymotic diseases, &c., in each of these towns, see Tables 19–28, pp. 253–7.

TABLE XXII.—MORTALITY of TWENTY LARGE ENGLISH TOWNS, 1868–78.

CITIES AND BOROUGHS.	ANNUAL DEATH-RATE PER 1000 LIVING (Years of 52 or 53 Weeks).

Liverpool - - -	29·6	27·8
Manchester - - -	30·1	28·2

Mortality statistics of certain large *town districts* were first published in 1868. The towns were represented by entire registration districts, sub-districts, or groups of districts, and although the figures relating to them approximately indicate the sanitary condition of the several towns, the areas of these places are not conterminate with the municipalities they are taken to represent.

The annexed table shows the average annual death-rates in each of two periods comprised in the last eight years, arranged according to the average annual rates prevailing in the latter period 1876–8.

TABLE XXIV.—DEATH-RATES in FIFTY LARGE TOWN DISTRICTS, 1871–78.

[Arranged according to the Average Annual Rates prevailing in 1876–78.]

In thirty-eight of these town districts the death-rate in the three years 1876–8 shows a reduction compared with the rate in the previous five years 1871–5. In thirteen town districts the death-rate was below 20 per 1000 (the rate laid down that none of our towns should exceed); in thirty-one town districts the rate was between 20 and 26 per 1000, and in six town districts it ranged from 26 to 29 per 1000.

Turning to the registration counties, it will be observed in the preliminary table No. 29, that the death-rate in 1878 was in excess of the average in Sussex, Berkshire, Northamptonshire, Bedfordshire, Essex, Suffolk, Norfolk, Wiltshire, Devonshire, Staffordshire, Worcestershire, Warwickshire, Rutlandshire, Lincolnshire, Lancashire, and the East Riding of Yorkshire; in London and South Wales the rate was also above the average.

Sex and age.—The deaths of 278,772 males, and of 261,100 females were registered in 1878. The death-rate of males was 23·0 per 1000 males living; that of females 20·5 per 1000 females living. The average rates in the 25 years 1848–72 were 23·4 for males and 21·4 for females. The deaths of males in the year were as 107 to 100 deaths of females; the average in 41 years being 104 to 100. These proportions are derived from the deaths among unequal numbers of males and females living, for there is an excess of females in the population. The deaths in 1878, were there *an equal number of both sexes* living, would be in the proportion of 112 deaths of males to every 100 deaths of females; the average proportion in 41 years was 109 to 100.

In Table XXV. the mortality at different ages in 1878 is compared with the average mortality at the same ages in the 25 years 1848–72, for each sex.

TABLE XXV.—ANNUAL RATE OF MORTALITY per 1000 Living in ENGLAND AND WALES at DIFFERENT AGES in the 25 years 1848–72, and in the year 1878.

Although the rates in 1878 at the younger ages compare favourably with the mean annual rate at those ages in the 25 years 1848–72, the mortality of children under five years of age was much higher than in the preceding year, owing to the large number of deaths from scarlet fever, whooping-cough, and diarrhœa. The excess in the death-rates of 1878 at the advanced ages was mainly due to the severe winter, which caused the death of many of the aged by diseases of the respiratory organs.

Since 1870 there has been a marked decrease in the mortality of children of both sexes under 5 years of age. The mortality of males, at ages between 5 and 25 years, has generally decreased during the last 41 years, at ages 25–35 it has remained nearly stationary, while at ages 35 and upwards it has increased. The mortality of females at ages between 5 and 45 years has diminished, at ages 45–55 it has remained nearly stationary, whereas at ages 55 and upwards it has increased. See preliminary tables 25–28.

TABLE XXVI.—ENGLAND. PROPORTIONAL MORTALITY at DIFFERENT AGES per 1000 of POPULATION living at ALL AGES.

AGE.	25 Years 1848–72.	1875.	1876.	1877.	1878.

85 and upwards -	·51	·54	·46	·47	·50

In the above Table (XXVI.) it will be seen how the mortality of the population in the aggregate is made up of deaths occurring at different ages; thus, the death-rate at all ages in 1878 was 21·72 per 1000 of population, this rate being 1·33 in excess of that in 1877; nearly the whole (1·02) of this excess was due to a higher rate of mortality among children under 5 years of age.

Table XXVII. shows the reductions in the mortality at the several ages in *London*, in the eight years 1871–8, compared with the average in the 30 years 1841–70.

* The rates for England and Wales are for the complete years, and not for the 52 or 53 weeks.

In eight of these towns the proportion was above the average of the eight years 1870–7, viz., Portsmouth, Brighton, Plymouth, London, Sunderland, Wolverhampton, Hull, and Norwich. The increased infant mortality in 1878 compared with the average, was due to the prevalence of zymotic diseases, chiefly whooping-cough and diarrhœa. For

the proportional mortality of infants from *different causes* in some of the large English towns see Appendix, Table 29.

Children under five years of age.—Out of 1000 persons living of all ages in England 22 died in 1878, of whom 9 were children under five years of age: any fluctuation in the mortality of children of this age greatly influences the mortality at all ages, thus the increase in the general death-rate in 1878, compared with the mortality in the previous year, was chiefly due to a higher rate among children.

The proportional number of children under five years of age dying in 1878 to 1000 children living of the same age was 66·7, and with this may be contrasted the proportional numbers in the twenty towns shown in the subjoined table.

NOTE.—The deaths of children under five years of age in eighteen of the above towns were supplied by the Medical Officers of Health.

* Mean of four years 1874–77.

† The Medical Officer of Health for Hull was unable to supply the information.

If the towns are arranged from the lowest rate at this age in 1878, Portsmouth stands first with a rate of 59·4, then Brighton 65·8, Bristol 66·2, Newcastle-on-Tyne 73·2, Wolverhampton 74·8, London 78·6, Bradford 80·3, Leicester 82·9, Nottingham 82·9, Manchester 83·4, Leeds 84·6, Norwich 84·7, Glasgow 86·2, Oldham 92·0, Sunderland

93·0, Salford 93·8, Birmingham 95·2, Sheffield 95·9, and Plymouth 98·1, while Liverpool 103·6, stands last on the hygienic scale.

Seasons.—The weather during the first three months of the year, with the exception of the last nine days, was exceedingly mild, the mean temperature of the air for the quarter (41°·5) being 2°·8 in excess of the average of 107 years. During these nine days, however, the weather was "bitterly inclement," snow fell on each of these days accompanied with very cold N. and N.E. winds, and the average daily deficiency of temperature was $6\frac{3}{4}°$; more trying weather than that on the 29th and 30th March had not been experienced during the winter. 139,373 deaths were registered during these three winter months, and the mortality was at the annual rate of 22·7 per 1000 of population, the average rate for this quarter in the preceding ten years being 24·0 per 1000. The mean reading of the barometer was high, and the rainfall at the Royal Observatory, Greenwich, was below its average in each month; the rainfall for the quarter showing a deficiency of two inches compared with the average of 63 years.

The mean temperature of the air during the second quarter of the year was 54°·6, or 2°·3 in excess of the average of 107 years. During the first 11 days of the quarter the weather was cold, and ungenial, but after this, a warm period set in; on the 20th May the weather again turned cold, but changed on the 20th June, and from this date to the end of the month the weather was warm. This quarter was remarkable for a deficiency of sunshine and for almost continuous rain during the month of May; the total fall for the quarter at Greenwich was no less than 13·2 inches, exceeding its average by 7·6 inches; so heavy a fall, for these three months, had not occurred since 1815. The mean reading of the barometer was 0·104 inch below its average; during May it was 0·168 inch below, and back to 1841 there was no instance of so low a mean reading for this month. The exceptional meteorological conditions of the season, however, did not unfavourably affect the public health. 129,096 deaths were registered during the 91 days, equal to an annual rate of 20·8 per 1000 of population, the average being 21·1 per 1000.

The temperature during the quarter ending 30th September was changeable, but exceeded the average in each month of the quarter; indeed in July the excess was as large as 1°·5. The hottest day of this month was the 19th when the temperature in the shade exceeded 80° at all the stations except two; at many stations it was nearly 90°, at Halifax 90°·2, and at Leeds 92°. High temperatures during this quarter were the cause of increased fatality from diarrhœa. 129,664 deaths were registered from all causes during the quarter, the death-rate being at the annual rate of 20·7, nearly the same as the average. The mean temperature of the quarter was 60°·8 or 0°·9 above the average. The rain-fall at Greenwich measured 6·5 inches, of which 0·3 inch fell in July, 5·4 inches in August, and 0·8 inch in September, being respectively 2·3 inches below, 3·0 inches above, and 1·6 inches below the average of 63 years; while the rain-fall in August was excessive, being greater than in any August during the preceding 63 years the fall in July was very deficient, and going back to the year 1815 there are but three instances of so small a fall in July. The mean reading of the barometer was 29·863 inches in July, 29·586 inches in August, and 29·819 inches in September, being respectively 0·060 inch above, 0·206 inch below, and 0·015 inch above the average of 37 years.

With the exception of the first 21, and the last six days of the December quarter, the weather was cold; on the 6th December the cold increased in intensity, on several days between the 6th and 25th December the mean temperature was more than 12° below its average, and on the 24th it was as much as $17\frac{1}{2}°$ below. The cold acted prejudicially on

the public health, and 141,739 deaths were registered during this quarter, equal to an annual rate of 22·6 per 1000 of population, or 0·8 per 1000 in excess of the average for the corresponding quarter of ten previous years. The mean reading of the barometer in each month was below the average. The rain-fall at Greenwich was 1·7 inches in October, 3·5 inches in November, and 1·2 inches in December, being respectively 1·1 inches below, 1·1 inches above, and 0·9 inch below the average of 63 years. The total fall for the quarter was 6·4 inches, or 0·9 inch below the average.

Deaths in Public Institutions in England.—These abstracts* show the number of deaths in 1878 in the public institutions of each registration sub-district. The total deaths registered in England and Wales were 539,872, out of which number 51,425, or 9·5 per cent., occurred in 1459 public institutions of England and Wales. Of these 51,425 deaths, 33,534, or 65 per cent., occurred in 718 workhouses, workhouse infirmaries, or workhouse schools; 13,136, or 26 per cent., in 658 hospitals or infirmaries; and 4755 or 9 per cent., in 83 lunatic asylums; so of the total number of persons who died in England in 1878, one out of 10 took place in one or other of 1459 public institutions, one out of 16 occurred in a workhouse, one out of 41 in an hospital, and one out of 114 in a lunatic asylum. Only those deaths registered in workhouses, hospitals and infirmaries, and public lunatic asylums are here noted, inasmuch as the mortality of the respective sub-districts in which they are situated is disturbed principally by these three classes of institutions; and the abstracts of such deaths afford the means of correcting the mortality, which in some districts and sub-districts is unduly raised owing to the number of deaths registered in hospitals and other large institutions within their limits.

The following Table (XXX.) shows the number of hospitals of all classes in England and Wales in each of the ten years 1869 to 1878.

TABLE XXX.—NUMBER of DEATHS REGISTERED in HOSPITALS in ENGLAND AND WALES in each of the Ten Years 1869–78.

YEARS.	HOSPITALS.				
	Number of Hospitals.	Increase in the number of Hospitals during the Year.	DEATHS.		
			Persons.	Males.	Females.
1869	241	—	9,747	6377	3370

1872	450	104	11,638	7927	3711
1873	500	50	11,209	7594	3615
1874	544	44	11,963	8029	3934
1875	582	38	12,548	8494	4054
1876	611	29	12,354	8148	4206
1877	644	33	12,570	8332	4238
1878	658	14	13,136	8596	4540

† The large number of deaths recorded in 1871 is owing to the epidemic of small-pox from which the country was suffering in that year. Many temporary hospitals were erected to meet the requirements of persons suffering from this disease.

The number of hospitals in 1878 was 658; the increase in recent years is mainly attributable to additional accommodation afforded for the sick in cottage hospitals.

* *See* pp. 99–120.

Further hospital accommodation in large towns is greatly needed for the treatment of persons suffering from infectious diseases.

The deaths of men in hospitals are about double those of women owing chiefly to men being more exposed in their occupations to accidents and injuries than women.

The deaths of 2700 male and 2055 female lunatics were registered in the year 1878 as occurring in 83 public asylums; insanity, therefore, is somewhat more frequently a cause of death among males than females, especially when the larger proportion of females in the population is considered.

TABLE XXXI.—MORTALITY STATISTICS of LUNATICS in ASYLUMS in ENGLAND and WALES, in each of the Ten Years 1869–78.

YEARS.	PUBLIC LUNATIC ASYLUMS.				MORTALITY.*		Proportion of Lunatics in all Asylums, at the end of each Year, to 1000 Population.
					Deaths to 1000 average daily number of residents.		
	Number of Asylums.	Deaths of			County and Borough Asylums.	All Asylums (including Private and Idiot Asylums).	
		Males.	Females.	Persons.			
1869	72	1975	1594	3569	111·6	107·2	2·43
1870	78	1989	1633	3622	108·1	102·9	2·49
1871	82	2314	1783	4097	107·1	102·3	2·54
1872	83	2160	1634	3794	95·7	91·9	2·58
1873	79	2425	1830	4255	107·0	101·6	2·62
1874	79	2473	2014	4487	106·7	102·9	2·66
1875	83	2758	2174	4932	113·6	108·5	2·68
1876	83	2569	2044	4613	106·0	100·8	2·71
1877	83	2663	2003	4666	103·1	99·0	2·76
1878	83	2700	2055	4755	104·3	100·0	2·78

* The proportions in these columns are extracted from the Thirty-third Annual Report of the Commissioners in Lunacy, pp. 24-5 and p. 11.

The Commissioners in Lunacy report that the mortality (deaths to 1000 average daily number of residents) among lunatics, in 1878, in county and borough asylums was 104·3. Amongst patients of all asylums, including those in private and idiot asylums, the rate of mortality was 100·0 per 1000.

The reports of the Commissioners show an increase in the number of the insane every year, and an increase also in the proportional number of lunatics to the population.

Period of five Years.	Proportion of Lunatics in all Asylums to 1000 Population.
In the five years 1859–63	2·03
,, ,, 1864–68	2·28
,, ,, 1869–73	2·53
,, ,, 1874–78	2·72

Thus the average proportion has increased from 2·03 in 1859–63 to 2·72 in 1874–8.

This increase is no doubt partly due to wider recognition of the advantages of asylums, and to a diminished rate of mortality among the insane owing to more skilful treatment.

Deaths in Public Institutions in London.—A reprint of the table published in the Annual Summary for London, 1878, showing the number of deaths registered in *all* public institutions of London, is appended to this Report.* In the fifty-two weeks of that year 15,502 deaths were registered in 157 public institutions. Of every 1000 of these deaths, 620 occurred in workhouses, 3 occurred in prisons, 5 in military asylums, 294 in general hospitals, 34 in hospitals for special diseases, 2 in lying-in hospitals, 12 in military and naval hospitals, 9 in hospitals for foreigners, and 21 in lunatic asylums.

Progress of Registration.

Names on the Registers, and Searches.—The names of 1,811,886 persons, whose marriages, births, or deaths were recorded in the registers during the year 1878 have been added to the printed alphabetical indexes of this office.

The indexes now comprehend an aggregate number of names amounting to 59,469,635, and extend over a period of 41½ years, viz., from the middle of 1837 to the 31st December 1878.

Table XXXII. exhibits the increase in the annual number of searches, but the figures are exclusive of searches in non-parochial registers, and of searches for purposes connected with the Factory Acts.

Table XXXII.—Total and Average Annual Number of Searches, 1845–78.

—	Total Number of Searches.	Average Annual Number.	—	Number of Searches to every 100,000 Names on the Books.

„ 1878 -	27,776	27,776	„ 1878 -	47·4

The provisions of the Registration Act are becoming more generally known by the legal profession; and increasing numbers of certificates are required for proof of death, as well as for pedigree purposes. Numerous applications for birth certificates are made by candidates for civil service clerkships and by those seeking employment in connection with the post office; the certificates are also largely required for life insurance purposes.

The greatest number of registration certificates issued is of those relating to births, and the number issued of marriages is considerably less than the number issued either of births or deaths.

* *See* Preliminary Table, No. 41.

The total number of searches in 1878 (including those relating to the non-parochial and other records) was 28,540, and the number of certificates issued was 22,903.

The amount received as fees for searches and certificates in the year 1878, and paid into Her Majesty's Exchequer, was 4313*l.* 8*s.* 6*d.*

For a list of the various public registers and records at this Office, see the 34th Annual Report, pp. xxi–ii.

United Kingdom.

The estimated population of the United Kingdom at the middle of the year 1878 amounted to 33,799,386, of whom 24,854,397 inhabited England and Wales, 3,593,929 inhabited Scotland, and 5,351,060 inhabited Ireland.

The number of emigrants, natives of Ireland, who left Irish ports in 1878 was 41,124, showing an increase of 2,621 compared with that in 1877. In Table XXXIII. it will be noticed that emigrants from Ireland since 1865 have been comparatively few; during the ten years 1866–75, they averaged 74,667, and in the three years 1876–8 only 39,071.

Table XXXIII.—Number of Native Emigrants from Ireland in each Year from 1851 to 1878.

Years.	Total.	Years.	Total.	Years.	Total.	Years.	Total.	Years.	Total.	Years.	Total.
1851*	152,060	1856	90,781	1861	64,292	1866	99,467	1871	71,240	1876	37,587
1852	190,822	1857	95,081	1862	70,117	1867	80,624	1872	78,102	1877	38,503
1853	173,148	1858	64,337	1863	117,229	1868	61,018	1873	90,149	1878	41,124
1854	140,555	1859	80,599	1864	114,169	1869	66,568	1874	73,184	Total 1851–78	2,494,605
1855	91,914	1860	84,621	1865	101,497	1870	74,855	1875	51,462		

* From the 1st of May, the date at which the collection of these returns commenced.

In the year 1878 the marriage-rate of the United Kingdom (persons married to 1000 of population) was 14·2, the birth-rate was 34·1, and the death-rate was 21·2.

The marriage, birth, and death-rates for England and Wales in 1878—15·3, 35·9, and 21·7 respectively,—have already been noticed.

The marriage-rate of Scotland (13·5) was much below that of England (15·3). The Registrar General of Scotland in his 21st Annual Report states that "no doubt the laws which regulate registration of marriage are "not the same in Scotland as in England; but their stringency is certainly "not less rigid on this side of the Tweed, where there is reason to believe "that a marriage hardly ever escapes registration." In the year 1878 the marriage rates in London and Edinburgh were 18·8 and 18·4 respectively. The Scottish birth and death-rates, 35·3 and 21·4 respectively, were somewhat below the English rates.

In consequence of defective registration the marriage and death rates for Ireland (9·5 and 18·6) differ considerably from those for England. The birth-rate (25·1) is depressed by the emigration of women at the child-bearing ages, and is therefore not altogether due to defective registration.

Mortality of the Army.

No certified copies of the particulars of the deaths in the Army abroad are received at this office, but His Royal Highness the Field Marshal Commanding-in-Chief has favoured me with returns, distinguishing the numbers of officers and men who died in Great Britain, Ireland, and abroad.

The average strength of the Army *at home and abroad* in the year 1878 was 200,758, and the number of deaths was 2249; so the rate of mortality was 11·2 per 1000 of strength, or 1·7 per 1000 above the rate in the preceding year.

The average strength of the Army *at home* was 109,201, and the deaths were 778: the rate of mortality per 1000 strength was 7·6 among officers, and 7·1 among non-commissioned officers and men, the average annual rates in the 17 years 1861–77 being 10·1 and 10·9 respectively; so the mortality of the British Army at home in 1878 was below that of the previous year, and much below the average.

TABLE XXXIV.—ANNUAL RATE of MORTALITY per 1000 among OFFICERS and NON-COMMISSIONED OFFICERS and MEN in the ARMY AT HOME and ABROAD, 1861–78.

YEARS.	AT HOME.		ABROAD.	
	Officers.	Non-commissioned Officers and Men.	Officers.	Non-commissioned Officers and Men.
Annually in the 17 years 1861–77 - - - -	10·1	10·9	13·8	17·4
In the year 1878 - - -	7·6	7·1	12·3	16·2
Decrease in 1878 - - -	2·5	3·8	1·5	1·2

The average strength of the Army *abroad* was 91,557, and the deaths were 1471. The rate of mortality per 1000 of strength was 12·3 among officers, and 16·2 among non-commissioned officers and men, against average annual rates in the 17 years 1861–77 of 13·8 and 17·4 respectively. The mortality, therefore, among officers serving abroad in 1878 was 1·5 per 1000 below the average, while that of non-commissioned officers and men serving abroad was 1·2 per 1000 below the average.

In the year 1878, 40 per cent. of the British Army were stationed in England and Wales, 2 per cent. in Scotland, 12 per cent. in Ireland, and 46 per cent. abroad.

MORTALITY OF THE NAVY.

Mr. J. N. Dick, Fleet Surgeon, R.N., reporting to Sir A. Armstrong, M.D., K.C.B., F.R.S., the Director-General of the Medical Department, shows that the sanitary condition of the Royal Navy in the year 1878 continued to be satisfactory. The total force in the service afloat was 46,400; the number of deaths from disease was 247, and the death-rate was 5·3, against 5·0 in the previous year.

Compared with the mortality in 1877 there was a great excess in the death-rate from violence. The total number of deaths from this cause was 422, which gives a ratio of 9·1 per 1000, showing an increase of 7·0 per 1000 on the death-rate of 1877. Of the 422 deaths by violence 311 were attributable to the loss of Her Majesty's ship "Eurydice;" deducting these, the normal death-rate in 1878 from violence will be 2·4.

Compared with the average of the previous 15 years, there was an increase in the total death-rate of 3·7 per 1000 force, but in the cases placed on the sick list there was a decrease of 51·0 per 1000. In the ratio of invaliding there was an increase of 1·3 per 1000.

* Including 311 deaths by the loss of Her Majesty's ship "Eurydice."
† Including 35 deaths from a boiler explosion in Her Majesty's ship "Thunderer."
‡ Including the deaths by the loss of Her Majesty's ship "Captain."
§ Including the deaths by the loss of Her Majesty's ship "Bombay."

Of the 247 deaths from disease, 16 were referred to enteric fever, 14 to remittent fever, 3 to cholera, 54 to consumption, 3 to apoplexy, 23 to heart diseases, 10 to aneurism, 31 to pneumonia, 7 to dysentery, 4 to diarrhœa, 19 to various diseases of the digestive organs, 7 to kidney diseases, and 2 to delirium tremens. Of the 422 deaths from violence, 28 were caused by wounds and injuries, 2 by burns and scalds, 391 by drowning, and 1 by suicide.

The death-rate from all causes per 1000 force in 1878, was 15·8 at ages 15–25, 11·8 at ages 25–35, 14·4 at ages 35–45, and 15·7 at ages 45 and upwards.

The mean force employed on the *home* station was 19,000, and the deaths were 137, being in the proportion of 7·2 per 1000, against 6·2 in the previous year. The mortality from disease on this station was 5·2 per 1000 force, from violence 2·0 per 1000; against 4·7 and 1·5 in the previous year.

BIRTHS AND DEATHS OF BRITISH SUBJECTS AT SEA.

Marine Register Book.—By the Act 37 and 38 Vict. c. 88., commanding officers of British ships not in Her Majesty's service, and commanding officers of foreign vessels trading to or from any port of the United Kingdom, are required, under a penalty, to transmit returns of *all* births and deaths occurring on board, to the Registrar-General of Shipping and Seamen, who has to send a certified copy of such particulars to me; and commanding officers of Her Majesty's ships are to forward returns of all births and deaths occurring on board, *direct* to me.

The certified copies of these returns of births and deaths of English subjects on board merchant vessels at sea, as well as those reported to me by commanding officers of Her Majesty's ships, are entered in a book, kept for the purpose at this Office, called the Marine Register Book. The numbers recorded in the year 1878 were 356 births and 4058 deaths.

291 births of children and 613 deaths occurred among *passengers* on board merchant vessels at sea.

Mercantile Marine.—The Registrar-General of Shipping and Seamen reports that the number of mariners at sea in registered vessels, in the year 1878 was 195,585. The deaths from all causes (excluding the deaths of masters but including some of those which occurred on board colonial and fishing vessels) were 3870, and the rate of mortality was 19·8 per 1000 of strength. The average annual mortality in the 27 years 1852–78 was 21·4 per 1000.

In the subjoined table the mortality in the merchant service by *drowning* is compared with the mortality in the Royal Navy from the same cause.

TABLE XXXVI.—DEATHS by DROWNING in the MERCHANT SERVICE and in the ROYAL NAVY in the Thirteen Years 1866–78.

YEARS.	MERCHANT SERVICE.							ROYAL NAVY.

Average in the 12 Years 1866–77 -	198,820	1607	1054	2661	8·1	5·3	13·4	47,150	104	2·2
1878 -	195,585	1164	922	2086	6·0	4·7	10·7	46,400	391‡	8·4

NOTE.—In the above Table some of the deaths on board colonial and fishing vessels are included, whereas the strength relates only to the registered vessels of the United Kingdom.

* The numbers of deaths in the above Table are not those which actually occurred during each year, but represent those "*reported*" in each year.

† Including the deaths by the loss of Her Majesty's ships "Captain" and "Slaney."

‡ Including 311 deaths by the loss of Her Majesty's ship "Eurydice."

Thus the total number of mariners drowned in 1878 was 2086 or 10·7 per 1000 strength, viz., 6·0 by wreck, and 4·7 by accident. The average annual rate in the 12 years 1866–77 was 13·4, viz., 8·1 by wreck, and 5·3 by accident.

The number of deaths by drowning in the Royal Navy in the year 1878 was 391 out of a total strength of 46,400, and the death-rate from this cause was 8·4 per 1000; but this exceptionally high rate was owing to the loss of Her Majesty's ship "Eurydice"; the average annual rate in the 12 years 1866–77 was 2·2 per 1000, and in the year 1877 the rate was no higher than 0·9 per 1000.

Wills.†

The number of probates and administrations granted at the Principal Registry during the year ending 31st October 1878 was 17,531. The value of the effects was sworn under 68,998,655*l.*

The number of probates and letters of administration granted in the 40 district registries during the year was 27,546. The value of the property under which these probates and administrations were sworn was 50,914,890*l.*

The results for the Principal and District Registries combined were—probates and administrations 45,077—value of effects sworn under 119,913,545*l.* The average value of each was 2660*l.* against 2811*l.* in the previous year. The proportion of people dying above the age of 21 who left wills, or left estates on which letters of administration were taken, was 16·6 per cent., or about 1 in 6.

Printed Calendars of all grants of probates and administrations from the year 1858 to the present time, showing the names and descriptions of the testators and intestates alphabetically arranged, together with other particulars, are deposited for public reference at this Office.

European States.

Vital statistics are now published for twelve of the chief States of Europe, arranged in conformity with the order determined by a resolution of the Statistical Congress held at St. Petersburgh in 1872. Switzerland has been recently added to the series.

In Table XXXVII. the marriage, birth, and death rates in the several European States during the year 1878 are compared with the average rates in previous years. Detailed returns relating to these countries will be found in a series of tables on pp. cxxi–cxxvii.

* The mean annual rates for Spain are for the ten years 1861-70, those for Italy are for the ten years 1863-72.

† See Judicial Statistics, England and Wales, 1878, Part II., pp. 18, 19.

Marriage-rate.—The most remarkable feature in these returns, in 1878, is the depression in the marriage-rate; in each State it was below the average of the preceding five years 1873–7.

The rate was most depressed in the German Empire, the reduction there being as great as 15 per cent. In Austria, Denmark, and Italy the falling off amounted to 11 per cent., in Switzerland to 10 per cent., in Sweden and England to 9 per cent., in Belgium to 8 per cent., and in France and the Netherlands to 7 per cent.

Birth-rate.—The reduction in the birth-rate in 1878, compared with that in the five years 1873–7, was greatest in Sweden, 3·9 per cent. In the German Empire it fell 3·7 per cent., in Belgium 3·4, in France 3·1, in Austria 3·0, in Italy 2·7, in Switzerland 2·5, and in the Netherlands 1·4 per cent. In England the birth-rate in 1878 was almost the same as the average, and in Denmark it was slightly in excess.

The birth-rate is lower in France than in any other European State. In the year 1872 it had risen to 26·8, but this was unusually high, and after being slightly above 26 in intervening years, it fell in 1877 to 25·5, and in 1878 to 25·2. Although no general decrease is observed in the marriage-rate of France, the birth-rate has, for many years, with more or less fluctuation, gradually decreased, as will be seen by the subjoined statement, and in the eight years 1871–8 with a higher marriage-rate, it was as low as 25·6.

	Persons married to 1000 Persons living.*	Births to 1000 Persons living.*

„ „ 1861–70	15·6	26·3
In the eight years 1871–78	16·3	25·6

The low birth-rate in France cannot be attributed to a small proportional number of women at the child-bearing ages, for the proportion is higher in France than in any other country of Europe; indeed it is generally recognised to be chiefly though indirectly due to the sub-division of land among the peasant proprietors. The better class of the labouring population aspire to become proprietors of small holdings: by thrift and industry they accumulate capital for this purpose, and avoid, by their social philosophy, the division of their property amongst a large family at their decease.

The recent census of France supplies the means for obtaining the proportional number of births to the married women at the child-bearing ages in the different departments, and some results have been deduced from the legitimate births in the three years 1875–7, and from the enumeration of the married women, aged 15 and under 45 years in 1876.

They show the influence which the division of the land exerts on the birth-rate, and therefore on the general prosperity of the community. The departments were arranged in the order of the proportional number of "*Cotes Foncières*"† to population in 1878.

---

* For the first five decenniads the rates are taken from "Annales de Démographie Internationale," 1877, by Dr. Chervin; for the later periods from French official publications.

† The number of "*Cotes Foncières*" in each department has been taken to represent, approximately, and for purposes of comparison only, the number of land holdings; they unfortunately include, however, "*propriétés bâties*" and "*propriétés non bâties.*"

It will be observed in the subjoined table of groups of departments that the proportional number of births is as a rule lowest in the groups having numerous small holdings, while those with fewer and probably larger holdings have a higher proportional number of births.

TABLE XXXVIII.

Groups of Departments.	Number of	
	Cotes Foncières to 1000 Population in the Year 1878.	Legitimate Births to 1000 married Women aged 15–45 in the Three Years 1875–77.
France - - -	385	196
17 departments with the greatest proportional number of *Cotes Foncières* - - - -	600	162
42 departments with an intermediate proportional number of *Cotes Foncières* - - -	448	197
23 departments with the smallest proportional number of *Cotes Foncières* - - - -	299	221

NOTE.—The Groups exclude the following departments, containing some of the large towns where exceptional circumstances exist :—Seine Inferièure, Landes, Rhône, Finistère, and Seine.

Table XXXIX. exhibits the proportional number of legitimate births to married women and of *Cotes Foncières* to population in each of 12 departments, viz., 6 departments where the proportion of births was lowest and 6 departments where it was highest; the relation between the birth-rate and the division of the land, as indicated in the previous table, is generally maintained. The last column of the table shows the prejudicial effect of the low birth-rate on the numbers of the population.

TABLE XXXIX.

Departments.	Number of		Increase or Decrease per cent. of the Civil Population, 1872 to 1876.
	Legitimate Births to 1000 married Women aged 15–45 in the Three Years 1875–77.	*Cotes Foncières* to 1000 Population in the Year 1878.

Arranging the departments according to the proportional number of "*Exploitations*" to the active population engaged in agriculture, results are obtained confirmatory of those derived from the "*Cotes Foncières.*"

TABLE XL.

GROUPS OF DEPARTMENTS.	Number of	
	Propriétés rurales to 1000 active Agricultural Population.*	Legitimate Births to 1000 married Women aged 15–45 in the Three Years 1875–77.
FRANCE - - -	599	196
21 departments with the greatest proportional number of *Propriétés rurales* - - - -	870	180
28 departments with an intermediate number of *Propriétés rurales* - - - - -	664	195
37 departments with the smallest number of *Propriétés rurales* - - - - -	457	213

NOTE.—The Groups exclude the department of the Seine.

* The term "active Agricultural Population" includes, according to the census of France in 1876, only those persons directly employed in agriculture as masters or labourers; members of their families and domestic servants not engaged in agriculture are excluded.

Death-rate.—In each of the foreign states the mortality was either about or below the average of the preceding five years. The death-rate per 1000 of population in 1878 was highest in Austria 31·1, in Italy it was 28·8, in the German Empire 26·2, Switzerland 23·4, the Netherlands 22·8, France 22·6, England 21·7, Belgium 21·5, and in Denmark and Sweden as low as 18·5 and 18·0 respectively.

I have the honour to be,
Sir,
Your faithful servant,
BRYDGES P. HENNIKER,
Registrar-General.

Remarks on the Meteorology of 1878.

By James Glaisher, Esq., F.R.S., &c.

The following remarks with regard to excess or deficiency of atmospheric pressure, temperature, and rain-fall are primarily derived from the observations made about London, but they may be taken as applying generally to the whole country.

Atmospheric Pressure.—The readings of the barometer were alternately above and below their averages from the 1st to the 8th of January, they were above from the 9th till the 22nd; and then again alternately above and below to the end of the month; from the 1st to the 9th of February they were considerably above their averages, the mean amount of excess being 0·56 inch; on the 10th the reading was that of its average; on the 11th and 12th the mean values were slightly above, and on the 13th and 14th a little below; from the 15th to the 26th they were all above; from the 27th of February till the 10th of March the readings were alternately above and below their averages; from the 11th to the 21st they were all above, and from the 22nd of March till the 5th of April they were all below, excepting on one day, viz., March 26th, when the value was 0·11 inch above. The pressure from April 6th to the 15th was in excess of the average; from the 16th to the 25th it was in defect; a period of readings alternately above and below their averages set in on the 26th, and lasted till the 5th of May; from the 6th to the 20th (with the exception of the 17th) the pressure was in defect of the average; on the two following days it was in excess; and from the 23rd to the 28th it was again in defect. The mean daily readings were above their averages from the 29th of May till 2nd of June, they were slightly below on the 3rd and 4th, and a little above on the 5th, 6th, and 7th, below from the 8th to the 18th, above from the 19th to the 27th, below from the 28th till 3rd of July; they were then 0·08 inch too high till the 9th, and a little below on the four following days; from July 14th till the 23rd they were 0·19 inch too high; the next four days were 0·15 inch too low; from July 28th till August 2nd the pressure was in excess, and averaged 0·20 inch daily; from August 3rd till the end of the month the readings (with the exception of the 8th, 9th, 18th, and 21st, which were slightly in excess of their averages) were low; and particularly so on the 14th, 16th, 23rd, 24th, 25th, 26th, 29th, and 30th, on which days the values were nearly half an inch below their averages, the average deficiency of pressure from August 3rd to 31st was 0·24 inch. From September 1st to 14th the atmospheric pressure was 0·07 inch too high; from the 15th to the 24th (with the exception of the 20th) the pressure was low, the average deficiency for this period was 0·15 inch, and from the 25th till the end of the month the mean daily excess of pressure was 0·15 inch. For the first five days of October the pressure was 0·30 inch in excess of the average; from the 6th to the 10th it was 0·32 inch in defect; from the 11th to the 17th 0·23 inch in excess; from the 18th October till the 17th of November the pressure was below the average (except on four days, viz., November 1st, 2nd, 3rd, and 9th), the mean amount of daily defect for the 31 days ending November 17th was 0·32 inch. From the 18th till the 23rd of November the pressure was 0·29 inch too high; from the 24th till the 28th it was on the average 0·40 inch too low; from the 28th of November till the 6th of December (with the exception of December 1st) the pressure was in excess of the average, the mean amount for this period being 0·10 inch, and from the 7th of December till the end of the year the pressure was on the average 0·37 inch in defect.

The highest reading of the barometer in the year at the height of 160 feet above the level of the sea was 30·507 inches on January 12th, and the lowest was 28·857 inches on October 26th; the yearly range was 1·650 inches.

Temperature.—The month of January was unusually mild, and the sky was generally overcast till the 24th day, with the exception of the 10th, 11th, 12th, and 13th; the temperature was above its average on every day, and on the 14th, 15th, 21st, and 22nd, to a very large amount; the temperatures on the 21st and 22nd, both day and night, were extremely high, and the excess of daily temperature from January 1st to the 24th was 5°·1. On the 25th a cold period set in (snow falling generally) and continued till February 12th; the average deficiency of temperature for these 19 days was 2°·6 daily. On February 13th a very warm period began, and on the 17th there was a remarkably high day temperature everywhere; this very warm period continued till March 13th (the first day of March being distinguished for high temperature), and for the 28 days ending March 13th; the daily excess of temperature was on the average as large as 7°; then there occurred five days of low temperature, the daily deficiency averaging $4\frac{1}{4}°$, then four days (March 18th–22nd) of warmth followed, the excess of temperature being $6\frac{1}{4}°$. Up to this time the weather since the beginning of the year had been exceedingly mild, but on March 23rd, bad weather set in with severity, and lasted generally till April 11th; several severe frosts were experienced during the first week of April. On the 12th the weather became warm, and from this day till May 19th, the mean temperature of every day was above its average; the mean excess of these 39 days was nearly 5°; on some of these days the excess of temperature was as large as 7° or 8°. On May 20th the weather again set in cold, and on nearly every day the mean temperature was below its average till June 19th; the average deficency of these 31 days was $2\frac{1}{2}°$ daily; from June 20th to the end of the month the temperature was in excess of its average, particularly from the 23rd to the 29th, when the weather was hot; the temperature at some places reached 90° or higher; the average daily excess of temperature for these 11 days was 7°. The weather at the beginning of July was cold; it somewhat moderated from the 5th to the 8th, but cool and cloudy weather was experienced till the 15th, and the average daily deficiency of temperature for the first 15 days of July was 1°. On the 16th the weather underwent a favourable change to higher temperature, and bright sunshine. The hottest day in the month was the 19th, on which day the maximum temperature was nearly 90° at many places, and at Leeds it even reached 92°; this warm weather continued till the 24th; the average excess of temperature was $7\frac{1}{4}°$ daily; from the 25th the weather was cool and changeable till August 3rd; the average deficiency was 1° for these 10 days. From the 4th to the 11th the daily excess of mean temperature was 3°·6, from the 12th to the 21st the temperature was nearly that of its average; on the 22nd a warm period began, and lasted till September 11th, the average excess for these 21 days was 1°·9; from the 12th till the end of the month the weather was mostly cold, and the average deficiency was 2°·1. Till the 21st of October the weather was generally fine and warm, the average daily excess of mean temperature was $3\frac{1}{2}°$ nearly; from the 22nd day the weather became cold, and the sky cloudy; this unpleasant weather continued throughout November, and during the first few days of December. On the 6th of December the cold increased in intensity, severe frosts set in, and very low temperatures continued till the evening of Christmas Day (25th); the average deficiency of daily temperature for the 65 days ending December 25th was 5°·6; between December 6th and 25th the mean temperature was more than 12° below the average on several days; and on the 24th it was as large

17½° below: the average deficiency of mean temperature for the 20 days ending December 25th was 10°·8. On December 26th the weather suddenly changed and became warm; the mean temperature of both December 30th and 31st was about 14° above the average, being 31° to 32° higher than it was six days previously, viz., on December 24th.

The highest temperatures of the air in the year were 94°·6 at Silloth, 93° at Llandudno, and 92° at Leeds, and the lowest were 5° at Carlisle, 5°·2 at Nottingham, 5°·6 at Oxford, and 5°·7 at Holkham.

Rain-fall.—The falls of rain were below their averages in January, February, and March; the total fall in these three months was 3·1 inches being 2·0 inches below the average. The total fall in April was 4·3 inches, being 2·6 inches above the average; on the 10th and 11th of April it fell very heavily at many places; at Caterham the fall in the two days was 1·6 inches, at Croydon 2·2 inches, at Blackheath (London) 2 inches nearly, at Greenwich Observatory 2·8 inches; and in the north of London the fall was the heaviest, at Camden Square the fall was 3·23 inches, and at Muswell Hill 2·8 inches. This unusual fall of rain caused very heavy floods in low lying places south of the Thames, and particularly at Lee and Lewisham. The fall of rain in May was 4·3 inches, being 2·3 inches above the average, it fell on nearly every day from the 6th, there were many heavy falls between the 6th and 11th of May; the heaviest of these was at Bath, 2·0 inches on the 10th, causing serious floods in that City; on the 11th 1·8 inch fell at Gloucester, and moderately heavy falls occurred in Cornwall and Devon. At Greenwich on the 7th of May the fall was 1·6 inch, of which one inch fell between 6h. p.m., and 6h. 50m. p.m. The total fall in June was 4·6 inches, being 2·7 inches above the average. The total fall in the three months ending June 30th was 13·2 inches, being no less than 7·6 inches above the average; the number of days on which rain fell in this period was 51, exceeding the average by 19 days The fall of rain in July was 0·3 inch only, being 2·3 inches below the average, and in the preceding 63 years there are but three instances of so small a fall in July, viz.:—In 1825 it was 0·1 inch, in 1835 it was 0·3 inch, and in 1864 it was 0·3 inch, so that really there is but one instance in that period of a *smaller* fall. The fall in August was large, being 5·4 inches, or 3·0 inches above the average, and larger than any fall in the month of August back to 1815, the nearest approach being in 1837, when the fall was 4·6 inches. The fall in September was 0·8 inch, being 1·6 inch below the average. The fall in October was 1·7 inch, or 1·1 inch below the average, in November it was 3·5 inches, being 1·1 inch above the average, and in December it was 1·2 inch, being 0·9 inch below the average. The total fall of rain in the year was 29·2 inches, being 3·8 inches above the average, and the number of days on which it fell was 166, exceeding the average by 31 days.

The heaviest falls of rain in the year were at Allenheads 47·72 inches, Stonyhurst 45·10 inches, and Truro 45·04 inches. The least falls were at Bournemouth 22·49 inches, Royston 23·36 inches, and Strathfield Turgiss 23·97 inches. The greatest number of rainy days in the year were 226 at Nottingham, 224 at Kelstern Grange, and 216 at Stonyhurst, and the least number were 150 at Osborne, 153 at Strathfield Turgiss, and 155 at Bournemouth.

Thunderstorms occurred on 90 different days during the year. The greatest number of days in any month was 18 in May; and the least, one day in both January and March. In February *no* thunderstorms were reported.

Thunder was heard, but lightning was not seen, on 81 days during the year, which were distributed as follows:—January 3, February and March

both one, April and November both 3, May 17, June 18, July and September both 7, August 19, and October 2.

Lightning was seen, but thunder was not heard, on 78 days in the year, 27 of which were in the last three months of the year. The number in 1877 at the same stations was 51 days.

Solar Halos were seen on 63 days in the year, and the number of days in each month was pretty equally distributed.

Lunar Halos were seen on 4 nights in January, 7 in February, 4 in March, 5 in April, 2 in May, 3 in June (in July no Lunar Halos were reported), 2 in August, 4 in September, 9 in October, 8 in November, and 8 in December, or on 56 nights during the year.

Auroræ Boreales were seen, on 25th of March at Carlisle, and on the 3rd of April at Torquay.

Snow fell on 85 days during the year (being 14 days more than in 1876 at the same stations), 47 of which were in November and December; in December snow fell at one or other places on 27 days. Snow fell as late as the 21st of May at Halifax, and as early as the 29th of October at several places.

Hail fell on no less than 108 different days during the year. The greatest number of days in any month was 21 in December, and the least one day in both July and August. The number in 1877 at the same places was 109 days, or one day more.

Fog prevailed on 187 days in the year, which were distributed as follows:—January 17, February 21, March 4, April 17, May 7, June 9, July 14, August 14, September 18, October 20, November 17, and December 29. Fog prevailed at one or other place on the first 29 days of December, which is somewhat remarkable.

The number of days in 1877 that fog prevailed at the same places was 149.

PRELIMINARY TABLES.

(1878.)

TABLE 1.—Estimated **Population,** and Number of **Marriages, Births,** and **Deaths** registered in **England,** in each of the Forty-one Years **1838–78.**

YEARS.	Estimated POPULATION in ENGLAND in the Middle of each Year.*	MARRIAGES.	PERSONS MARRIED.	BIRTHS (exclusive of Still-born).	DEATHS	EXCESS OF BIRTHS OVER DEATHS.
1838	15,287,699	118,067	236,134	463,787	342,760	121,027
1839	15,514,255	123,166	246,332	492,574	338,984	153,590

1878	24,854,397	190,054	380,108	891,906	539,872	352,034

NOTE.—The Births and Deaths Registration Act of 1874, which rendered the registration of births compulsory, came into operation on 1st January 1875.

* These estimates are calculated from the numbers enumerated at the Censuses taken in 1841–51–61–71. For the estimated numbers of the males and females in each year, and population estimates for years prior to 1838, *see* Table 70.

TABLE 2.—**Proportions** of **Persons Married, Births,** and **Deaths** to **1000** of the **Population** of **England,** in each of the Forty-one Years **1838–78.**

1878 - -	15·3	35·9	21·7	65	28	46
Mean in 41 years	16·5	34·1	22·2	61	29	45

NOTE.—The Table may be read thus:—In the year 1838 to every 10,000 persons living there were 154 persons married, 303 births, and 224 deaths; the numbers of persons living to every person married, birth or death, were 65, 33, and 45 respectively. The rates in this Table have been calculated upon the estimated populations given in Table 1, but no corrections have been made for the difference between the ordinary year of 365 days and the leap year.

TABLE 3.—**Proportions** of **Persons Married**, of **Births** and of **Deaths** to **1000** of the **Population** of **England**, during the Forty-one Years **1838–78.**

YEARS.	To 1000 Persons living.			The Number of Persons living.

Mean Annual Rate per 1000 in each quarter during the 41 years					13·7	16·8	15·9	19·6

Note.—The three months January, February, and March contain 90 days, and in leap year 91 days; the three months April, May, and June 91 days; and each of the last two quarters of the year 92 days. For this inequality a correction has been made in the above calculations.

* These rates may be thus read without reference to the decimal points:—In the March quarter of 1838, to 10,000 persons living, 124 persons were married.

TABLE 8.—**Marriages** in **England**. The Proportion per Cent. of **Minors** of each Sex, of Males and Females who **signed the Marriage Register with Marks**, and of Persons who were **Widowers** or **Widows**, in each of the Thirty-eight Years **1841–78.**

1878	220,792	228,620	222,604	219,890	36·0	36·9	35·5	35·1
Mean Annual Rate per 1000 in each Quarter during the 41 years					35·7	35·3	32·9	32·8

NOTE.—The Births and Deaths Registration Act of 1874, which rendered the registration of births compulsory, came into operation on 1st January 1875.

* These rates may thus be read without reference to the decimal points:—In the March quarter of 1838, to 10,000 persons living 303 births were registered. In the calculation of these rates a correction has been made for the varying number of days in the different quarters, *see* note to Table 7.

TABLE **14.**—**Proportional** Number of **Births** in **England** in each **Quarter** to **1000 Births** in the **Average Quarter*** of each of the Forty-one Years **1838–78.**

YEARS.	NUMBER OF BIRTHS IN THE AVERAGE QUARTER.	PROPORTIONAL NUMBER OF BIRTHS.				
		In the AVERAGE QUARTER (assumed to be 1000).	FIRST QUARTER ending March 31.	SECOND QUARTER ending June 30.	THIRD QUARTER ending Sept. 30.	FOURTH QUARTER ending Dec. 31.

Average proportion in 41 years, 1838–78			22·2	23·3	21·2	104	109

The Table may be read thus:—In the year 1838 to every 1000 males living there were 23·4 deaths of males; to every 1000 females living there were 21·5 deaths of females; and to each 100 deaths of females there were 105 deaths of males. The last column shows the *relative mortality of males and females*; and that out of equal *numbers living* the deaths of males were as 109 to every 100 deaths of females in 1838.

TABLE 21.—**Number,** and **Annual Rate** per 1000 Persons living, of **Deaths** in **England** during each **Quarter** of the Forty-one Years **1838–78.**

Mean Annual Rate per 1000 in the four Quarters of the 41 years					24·8	21·9	20·5	21·8

* These rates may thus be read, without reference to the decimal points:—In the March quarter of the year 1838, in 10,000 of the population 262 deaths were registered. A correction has been made in these calculations for the inequality in the number of days in the different quarters, *see* note to Table 7.

TABLE **22.—Proportional Number** of **Deaths** in **England** in each **Quarter** to **1000 Deaths** in the **Average Quarter*** of each of the Forty-one Years **1838–78.**

YEARS.	NUMBER OF DEATHS IN THE AVERAGE QUARTER.	PROPORTIONAL NUMBER OF DEATHS				
		In the AVERAGE QUARTER (assumed to be 1000).	FIRST QUARTER ending March 31.	SECOND QUARTER ending June 30.	THIRD QUARTER ending Sept. 30.	FOURTH QUARTER ending Dec. 31.

Note.—The Table may thus be read:—Of each 1000 male children living under five years of age, 71·9 died in each of the 41 years 1838–78; in the five years 1841–45 this proportion averaged 68·8 per 1000; and in the five years 1871–75 it was 70·0.

* The population used in these calculations is deduced from the ascertained rates of increase observed in the 30 years 1841–71 (*see* Table 70), distributed in the several groups of ages according to the proportions found to prevail at the last four Censuses.

TABLE **26.**—ENGLAND.—**Annual Rate** of **Mortality** per 1000 of **Males** living at Twelve groups of Ages in each of the Forty-one Years **1838–78.***

(3 Years.) 1876-78	19·7	57·9	6·0	3·7	5·3	6·5	8·2	11·5	15·1	28·7	59·6	130·8	277·5

Note.—The Table may thus be read:—Of each 1000 female children living under five years of age, 62·0 died in each of the 41 years 1838-78; in the five years 1841-45 this proportion averaged 58·6 per 1000; and in the five years 1871-75 it was 60·2.

* The population used in these calculations is deduced from the ascertained rates of increase observed in the 30 years 1841-71 (*see* Table 70), distributed in the several groups of ages according to the proportions found to prevail at the last four Censuses.

TABLE **28.**—ENGLAND.—**Annual Rate** of **Mortality** per **1000** of **Females** living at Twelve groups of Ages in each of the Forty-one Years **1838–78.***

NOTE.—The mean rates of mortality in these Town Districts have been calculated from the numbers supplied by the local Registrars i Quarterly Returns, which served as the basis of the annual rates published from time to time in the Registrar-General's Quarterly Retur Annual Summaries.

The letter M or P affixed to the name of each Town denotes whether the limits, which the District or Sub-districts named in the last c of Table 39 approximately represent, are Municipal or Parliamentary. Impt. D. signifies Improvement District.

* The area taken to represent the boroughs of Roc dale, Huddersfield, and Halifax, was not co-extensive throughout the seven years.

† The rates of mortality for these towns have been corrected by the exclusion of a proportional number of deaths occurring in County Hc and Lunatic Asylums, situate within the District or Sub-districts here taken as representing the town, or by the exclusion or additio proportion of the deaths in Union Workhouses in cases where only a portion of the Union is embraced by the area taken, or where the Wor situated outside that area.

TABLE 39.—**Population; Births** and **Deaths**; and **Rates of Mortality** during 1878 in **Fifty large Town Districts.**

NOTE.—The letter M or P affixed to the name of each Town denotes whether the limits, which the District or Sub-districts named in the last column approximately represent, are Municipal or Parliamentary. Impt. D. signifies Improvement District.

* For method of framing these estimates see note * to Table 40. As the population of Devonport, Macclesfield, and Ashton-under-Lyne declined between 1861 and 1871, the numbers for these towns are estimated to have remained stationary since 1871. The estimates of the present population of Dudley, Coventry, Wigan, Barrow-in-Furness, and Middlesbroughbhave been based upon local information as to the increase of the inhabited houses in these boroughs.

† The rates of mortality for these towns have been corrected by the exclusion of a proportional number of deaths occurring in County Hospitals and Lunatic Asylums, situate within the District or Sub-districts here taken as representing the town, or by the exclusion or addition of a proportion of the deaths in Union Workhouses in cases where only a portion of the Union is embraced by the area taken or where the Workhouse is situated outside that area.

TABLE 40.—**Population; Persons** to an **Acre; Births** and **Deaths; Annual Birth** and **Death Rates; Mean Temperature** and **Rainfall,** in the 52 Weeks of the Year **1878,** in LONDON and TWENTY-TWO other LARGE TOWNS of the UNITED KINGDOM.

NOTE.—The deaths in Birmingham, Manchester, and Bristol include paupers belonging to those cities who died in Workhouses situate outside the Municipal boundaries.

* The figures in this column, excepting those for Nottingham, Salford, Oldham, and Dublin, are the numbers enumerated at the Census in April 1871, raised to the middle of 1878 by the addition of 7½ times the annual rate of increase which prevailed between 1861 and 1871. The rate of increase of population in Nottingham, Salford, and Oldham having since 1871 exceeded that which prevailed during the ten years 1861-71, revised estimates have been adopted for those three boroughs, based upon special returns of inhabited houses now existing within those boroughs. The population of Dublin is taken as stationary at the number enumerated in April 1871.

TABLE 41.—LONDON.—**Deaths in Public Institutions** in the 52 or 53 Weeks of each of the Thirteen Years **1866-78.***

* This Table is compiled from the Weekly Returns made by the Registrars of London, and relates to the 52 or 53 weeks of each year. The figures for 1878 will not agree with those given on page 100, which relate to the correct year instead of the 52 weeks; moreover, the same Institutions are not in all cases included in each list.

† Previously to the year 1870 the Royal Naval Hospital at Greenwich was classed with "Military and Naval Asylums"; since that year no In-pensioners have been received there.

Average Number living to One Annual Death in 39 years . . .	42	45	44	40	39	41

NOTE.—The populations upon which these rates of mortality have been calculated are deduced from the numbers enumerated at the four Censuses of 1841, 1851, 1861, and 1871. The rates are calculated upon the deaths registered during each natural year from 1st January to 31st December. Hampstead and Lewisham did not form part of Registration London prior to 1847.

Certain alterations affecting the West and Central groups of districts were made in the year 1868, but no corrections have been made in the results given in this Table for any year prior to 1861.

* In estimating the population of these Districts, upon which the birth and death-rates have been calculated, it has been assumed that the rate of increase in Greater London since 1871 has been the same as that which prevailed between 1861 and 1871; the estimate for the Outer Ring is obtained by the deduction of the estimated population of Inner London from that of Greater London. The estimates for the suburban districts have been adjusted to cast to the estimated total of the population of the Outer Ring, obtained in the manner above described. In calculating the rates of mortality for the above Table, a proportion of the deaths recorded in the three Middlesex County Lunatic Asylums, situated in the Districts of Epsom, Uxbridge, and Barnet, has been excluded as belonging to the Middlesex portion of Registration or Inner London, and the remainder distributed among the Middlesex Districts in the Outer Ring.

1878 - -	13,471,450	27,910,012	18,088,173	59,469,635	27,776	4,313 8 6

NOTE.—The numbers for 1837 were registered in the half-year ending 31st December.

TABLE **52.—Area,** estimated **Population,** and **Marriages, Births,** and **Deaths** registered in the **United Kingdom,** in the Year **1878.**

	Area in Acres.	Area in Hectares.	Estimated Population in the middle of the Year 1878.	Marriages.	Persons Married.	Births.	Deaths.
United Kingdom	77,635,301	31,416,757	33,799,386	239,671	479,342	1,152,730	716,276
Great Britain - -	56,815,354	22,991,528	28,448,326	214,387	428,774	1,018,613	616,647
England and Wales -	37,319,221	15,102,008	24,854,397	190,054	380,108	891,906	539,872
Scotland - - -	19,496,133	7,889,520	3,593,929	24,333	48,666	126,707	76,775
Ireland * - - -	20,819,947	8,425,229	5,351,060	25,284	50,568	134,117	99,629

* On the authority of the Registrar General of Ireland it may be assumed that the numbers of marriages, births, and deaths, in that part of the United Kingdom are understated through defective registration.

TABLE **53.—Proportion** per **1000** of **Marriages, Births,** and **Deaths** to the Population of the **United Kingdom,** in the Year **1878.**

	Acres to a Person.	Hectares to a Person.	To 1000 Persons living.			
			Marriages.	Persons Married.	Births.	Deaths.
United Kingdom - -	2·30	·93	7·09	14·2	34·1	21·2
Great Britain - - -	2·00	·81	7·54	15·1	35·8	21·7
England and Wales - -	1·50	·61	7·65	15·3	35·9	21·7
Scotland - - - - -	5·42	2·20	6·77	13·5	35·3	21·4
Ireland - - - -	3·89	1·57	4·73	9·5	25·1	18·6

Note.—The total area of a country, divided by its population, gives the average area to each person. The reciprocal gives the "density" of the population, or the population to each acre, square mile, or other measure.

TABLE **54.—Population, Area, Births,** and **Deaths** in the **Islands** in the **British Seas** in each of the Twenty-eight Years **1851-1878.**

YEARS.	ISLANDS IN THE BRITISH SEAS.		ISLE OF MAN.		ISLAND OF JERSEY.		GUERNSEY AND ADJACENT ISLANDS.

Total	1,572,135	5,612,659	1,233,913	273,869	8,692,576

Average annual emigration from the United Kingdom — From 1815 to 1878 - - 135,822; For the 10 years 1869–78 - - 219,391

* The Customs' returns do not distinguish the emigration to Australia during the 10 years 1815–24, but it appears from other sources that the emigrants who went to this country were in 1821, 320; in 1822, 875; in 1823, 543; in 1824, 780; and in 1825, 458 persons. These numbers are not included in the totals of this Table.

† The numbers of emigrants of British origin were 228,345 in 1873; 197,272 in 1874; 140,675 in 1875; 109,469 in 1876; 95,195 in 1877; and 112,902 in 1878.

In the 27 years 1852–78	5,040,642	107,788	21·4

* Deduced from a return of the number of accounts of wages and effects of seamen (exclusive of masters) dying before the termination of the voyage, received by the Registrar General of Shipping and Seamen. Since 1867 the return *includes seamen dying ashore in foreign parts*, whose wages and effects are delivered to the consuls, or officers of the hospitals, on their discharge from their ships.

If a *seaman* die on the passage from Sunderland to Calcutta, his death is reported at Calcutta, and his wages and effects are accounted for and transmitted home, if the vessel be not to return direct to the United Kingdom. But if a *passenger* die on board a ship which does not return to a British port immediately, but trades for a time in foreign parts, considerable delay may occur before his death is reported. In all cases, however, the date is given; in the accompanying tables the births and deaths are classed according to the years in which they were reported. In some passenger-ships women are employed as stewardesses, and are counted as part of the crew. They therefore form part of the strength in this Table, and if the death of a stewardess occur in the course of a voyage, it is included in the column of Deaths.

When a ship is lost with all persons on board, the owners return the number and names of the crew, and the names of the passengers, when known, to the Registrar General of Shipping and Seamen.

TABLE **68.**—RETURN of the AGES, RATING, and CAUSES of DEATH of 3870 **Seamen** reported to the BOARD OF TRADE in the Year 1878 as having died in the **British Merchant Service.** (*Parliamentary Return, Session of* 1878.)

1845	17·2	General prosperity of the country. Improvement in the revenue. Potato disease in England and Ireland. Short corn crops. Great increase of railway undertakings. Speculation mania, followed by commercial panic. Sikh war	Deficient	50
1846	17·2	Caffre war. Free Trade Bill passed. Corn Law repealed	Do.	54
1847	15·8	Commercial panic. £10,000,000 for Irish relief. Act relating to Free Trade came into operation. Owing to partial failure of crops the duty on corn was suspended till March 1848	Above the average	69
1848	15·9	Chartist riots. Sikh war. Agitation in Ireland. Revenue deficient	Very bad	50
1849	16·2	Cholera epidemic. Punjaub annexed. Duty on corn reduced to 1*s.* per quarter	Above the average	44
1850	17·2	Improvement of trade and revenue. Diminution of pauperism. Depressed condition of the agricultural classes was the only exception to the general prosperity of the country. Caffre war ended	Below the average	40
1851	17·2	Australian gold discovered. Great Exhibition opened	About the average	38
1852	17·5	Napoleon III. Emperor. Pegu annexed	Below the average	40
1853	17·9	Rise in the price of provisions owing to the bad harvest, and to general prosperity especially of the labouring classes; the very poor, however, suffered great privations	Bad	52
1854	17·2	War declared against Russia	Extremely good	72
1855	16·2	Russian war continued	Below the average	74
1856	16·7	Russian treaty. War with China and Persia. Revenue deficient	About the average	69
1857	16·5	Indian revolt. Great commercial panic	Above the average	56
1858	16·0	The commercial disturbance and distress of 1857 caused the revenue to fall short of the estimates during the the greater part of the year, but towards its close there were indications of improvement. The cost of the necessaries of life was lower than in 1856 or 1857	Do.	44
1859	17·0	At the commencement of the year pauperism had decreased and a spirit of general contentment prevailed. Treaties of commerce were concluded between England and Russia, and also with Japan. War with China	Under the average	43
1860	17·1	Commercial treaty with France. War in New Zealand. War with China; surrender of Pekin. Neapolitan revolt. Annexation of Savoy and Nice to France	Very deficient	53
1861	16·3	Famine in N.W. provinces of India. Owners of cotton mills in Lancashire began to employ hands on short time. Revenue deficient. Disruption of United States	Under the average	55
1862	16·1	Distress in cotton districts. Revenue deficient	Much below the average	55
1863	16·8	Continued distress in the cotton districts. Marriage of the Prince of Wales. War in New Zealand	Abundant	44

† The real value of Imports was not ascertained until the year 1854, and no results were published until the year 1855.

TABLE **69.** (*continued*)—FLUCTUATIONS in the MARRIAGE RATE of ENGLA

YEARS.	MARRIAGE RATE in ENGLAND. Persons married to 1000 Persons living.	CAUSES which have probably contributed either to raise or depress the MARRIAGE RATE. Current Events and General State of the Country.	Result of the Harvest.	AVERAG PRICE OF WHE per Quarte in Engla s.	d
1864	17·3	Duty on corn 3*d.* per cwt. War in New Zealand brought to a close	Good	40	2
1865	17·5	Cattle plague. Fenian conspiracy in Ireland	Below the average	41	9
1866	17·5	Great monetary panic in London. Cholera epidemic	Very unfavourable	49	11
1867	16·5	General commercial depression, and distress occasioned by want of employment among the artisan class. Rise in the price of bread	Deficient	64	5
1868	16·1	Abyssinian war. Revenue deficient	Productive	63	9
1869	15·9	Woolwich dockyard closed. Duty on corn ceased. No healthy revival of trade since commercial crisis of 1866. Revenue deficient. Opening of Suez canal	Deficient	48	2
1870	16·1	Trade and commerce depressed. Franco-German war	Under the average	46	10
1871	16·7	Revival of industrial and commercial activity. Cattle disease. Rise in prices and in the wages of labour. Bank Holiday Act	Deficient	56	10
1872	17·5	The year commenced with every promise of commercial prosperity, and there was a great increase of railway traffic. Great rise in the prices of the common commodities of life, which pressed hardly upon the salaried middle classes. Payment by France to Germany of 220 million pounds sterling	Do.	57	1
1873	17·6	American railway panic. Reaction from the high prices and excited demands in 1871 and 1872. Trade continued moderately active	Much below the average	58	8
1874	17·1	Strikes and disputes between masters and men. Wages in mining, iron, and steel trades fell. Price of commodities and wages generally declined	Very good	55	9
1875	16·8	Iron, coal, hardware, and shipbuilding trades agitated by strikes. Repudiation by Turkey of part of its obligations. Fall in price of silver	Very unsatisfactory	45	2
1876	16·7	Reduced wages. Commercial failures	Unsatisfactory	46	2
1877	15·8	Prevalence of strikes. The year was unfavourable for the farmer. Depression on the Continent and in United States. Political conflict in France. War between Russia and Turkey. Famine in Southern India	Do.	56	9
1878	15·2	War continued between Russia and Turkey. Treaty of Berlin in June. In September rupture between Indian Government and the Ameer of Afghanistan. Prices of commodities, and wages, continued to decline. Prevalence of strikes, resulting generally in the defeat of the strikers. Bank failures. Failure of iron and coal industries. Trade and commerce depressed	Good	46	5

1874–78	16·3			50	1

NOTE.—By Act George IV. c. 60. a scale of duties was fixed, to be paid on wheat imported from a foreign country. T duty was 2*l.* 8*s.* 8*d.*, and as the average price per quarter increased the duty decreased, so that when the price reached 73*s.* By Act 9 & 10 Vict. c. 22 the duty was reduced to a uniform rate of 1*s.* per quarter, but (owing to the "*partial failure* it was further suspended till 1st March 1848; by Act 12 & 13 Vict. c. 90, however, the duty was to be paid from and after charged, and by Act 32 & 33 Vict. c. 14 the duty after 1st June 1869 ceased altogether.

TABLE 71.

ESTIMATED POPULATION OF THE UNITED KINGDOM,

(including ISLANDS in the BRITISH SEAS)

with Army, Navy, and Merchant Seamen abroad belonging thereto.*

Middle of the Census Years.	PERSONS.	MALES.	FEMALES.
1801 -	16,302,410	8,096,082	8,206,328
1811 -	18,532,522	9,194,348	9,338,174
1821 -	21,300,573	10,519,256	10,781,317
1831 -	24,423,588	12,004,025	12,419,563
1841 -	27,077,095	13,325,889	13,751,206
1851 -	27,764,034	13,656,998	14,107,036
1861 -	29,358,927	14,397,427	14,961,500
1871 -	31,914,985	15,622,725	16,292,260

* In estimating the number of men in the Army, Navy, and Merchant Service abroad, the proportion belonging to foreign countries and the colonies has been excluded. In 1811 the troops and seamen were 640,500, but as this number included natives of colonies and foreign parts, only 502,536 were taken.

The above numbers have been deduced by adding to the estimated population of the United Kingdom, as given in Table 70, the enumerated population of the Islands in the British Seas, and the Army, Navy, and Merchant Service abroad (*see* p. vii. of Vol. I. Census of England and Wales, 1871).

1878	1,939,600	14,295	28,590	61,290	35,792	14·7	31·6	18·5

NOTE.—An addition of territory containing a population of about 8000 was made in 1864, and the facts relating to these are shown in this Table from 1860. Previously to 1st January 1860, children who died within 24 hours after birth were counted as still-born.

* Census years.

† Cholera was epidemic in the year 1853, and war raged in the years 1850 and 1864.

TABLE **76.**—SWEDEN. **Population; Number,** and **Proportion** per 1000, of **Persons Married, Births,** and **Deaths,** in each of the Years **1850** to **1878.**

1878	4,531,863	29,151	58,302	134,464	81,418	12·9	29·7	18·0

* The populations for these years were enumerated at the respective Censuses. Dr. Berg attributes the decrease observable in the population in the years 1868 and 1869 to failure of crops and consequent emigration.

† Cholera was epidemic in the years 1853, 1857, and 1866. In 1874 small-pox caused 4063 deaths, the highest number in any year since 1801. In 1877 scarlet fever caused 7426 deaths and diphtheria 3367 deaths.

TABLE **77.**—AUSTRIA. **Population; Number,** and **Proportion** per 1000, of **Persons Married, Births,** and **Deaths,** in each of the Years **1853** to **1878.**

(Furnished by Dr. A. Ficker, the Chief of the Statistical Department of Austria.)

NOTE.—The Returns for Austria include Hungary, Croatia, Sclavonia, and Transylvania from 1853 to 1862 inclusive; since 1862 the returns exclude those portions of the empire. Until 1864 Venetia was included; since 1864, however, it has been excluded. The facts for Hungary and Transylvania for years subsequent to 1865 appear in Table 78.

* Census years.

† The excessive mortality in the year 1866 was due to cholera and the war.

‡ Cholera caused the deaths of 107,007 persons in the year 1873.

TABLE **78.**—HUNGARY AND TRANSYLVANIA. **Population; Number,** and **Proportion** per 1000, of **Persons Married, Births,** and **Deaths,** in each of the Years **1866** to **1878.**

NOTE.—The population in the four years 1862-65 and in the years 1867-69 was estimated by means of the average annual rate of increase observed between the two enumerations of 1861 and 1866. The returns since the year 1860 include the three newly annexed departments. The deaths of Frenchmen abroad, civil or military, are registered in the books of the Commune in which they were last domiciled.

* Census years. † Cholera prevailed in 1865-66, and war raged in 1870 and 1871.

1868	16,853,212	111,684	223,368	579,464	548,690	13·3	34·4	32·6
1869	16,883,986	137,120	274,240	602,287	550,660	16·2	35·7	32·6
1870*	16,935,613	105,543	211,086	599,786	509,669	12·5	35·4	30·1

NOTE.—The Population enumerated at the Census of 1860 was 15,673,536. The estimated Population for the Years subsequent to 1861 has been deduced from the Excess of Births over Deaths in each Year. The decline of registered marriages in 1870 is believed to be due to the introduction of civil registration, which occurred during that year.

* No figures have been received for years subsequent to 1870, in consequence of the disturbed condition of the country.

TABLE **86.**—ITALY (inclusive of VENETIA). **Population; Number,** and **Proportion** per 1000, of **Persons Married, Births,** and **Deaths,** in each of the Years **1863** to **1878.**

NOTE.—The Population was estimated in the following manner: To the population of Italy, exclusive of Venetia, according to the census on 31st December 1861, was added the population of Venetia, according to the Austrian census in 1858, and also the excess of Births over Deaths in each year. No correction was made either for immigration or emigration. The population for 1871 (except for Rome, where the census was not taken until 1872) is that enumerated at the census on the last day of December 1871. The facts for Rome were first included with those for the kingdom of Italy in 1872.

* Census year.

† The decrease of marriages in 1866 may be attributed to the law, which then came into operation, introducing civil marriage and rendering the church marriages of no legal effect. There had been a marked increase in 1865 resulting from a wish to evade the law about to come into operation. After the 1st of January 1866 the marriages solemnized only in the churches, without civil contract, not being legally recognized, have not been registered; their number, which was very great in 1866 and the following year, is happily decreasing.

TABLE 87.—Changes in the Constitution of the Superintendent Registrars' Districts and Registration Sub-districts during the Year 1878.

[The Name of the District is in SMALL CAPITALS, that of the Sub-district in *Italics*. The figures in Cols. 1. and 4. show the number of the District and Sub-district.]

Superintendent Registrar's DISTRICT and Registrar's *Sub-district* in which a change was effected, or from which a transference was made.	Date of Change.	Place and Population (1871) transferred from the District in Column 1 to the District in Column 4.	Superintendent Registrar's DISTRICT and Registrar's *Sub-district* in which a change was effected, or to which an addition was made.
STRAND (11): *Long Acre* (1) - - -	1st Aug.	Long Acre Sub-district - 11,379	The two Sub-districts of *Long Acre* and *Charing Cross* united for Registration purposes, and to form one Registrar's Sub-district, viz. "*St. Martin in the Fields*" Sub-district (1).
Charing Cross (2) - -	„	Charing Cross Sub-district 9,859	
WESTBOURNE (85): *Funtington* (1) -	1st Feb.	Funtington Sub-district 3,207	The two Sub-districts of *Funtington* and *Westbourne* united for Registration purposes, and to form one Registrar's Sub-district, viz. "*Westbourne*" Sub-district.
Westbourne (2) -	„	Westbourne Sub-district 4,014	
ST. THOMAS (271): *Heavitree* (6) -	15th July	The parish of St. Leonard's, save and except the portions, &c. &c. (*see* City of Exeter Extension Act, 1877, 40 & 41 Vict. c. cxli.) Population - 1,697 Area in Acres - 158	EXETER (272): *St. Sidwell* (1) to be hereafter called the "*Exeter Eastern*" Sub-district. The Sub-district of *St. David* (2) to be henceforth called "*Exeter Western*" Sub-district.
TEWKESBURY (336): *Deerhurst* (1) -	1st July	Deerhurst Sub-district - 4,206	The two Sub-districts of *Deerhurst* and *Tewkesbury* united for Registration purposes, and to form one Registrar's Sub-district, viz. "*Tewkesbury*" Sub-district (1).
Tewkesbury (3) -	„	Tewkesbury Sub-district 7,228	
PRESTON (476): *Preston* (2) - -	1st Jan.	Fishwick Township - 1,912 Preston Township - 83,515	To be divided into three Sub-districts, viz.: (2) *Trinity*, comprising Trinity and Fishwick wards. (3) *St. Peter*, comprising St. Peter's ward. (4) *St. John*, comprising Christchurch and St. George's wards. The remaining Sub-districts to be renumbered.
HUDDERSFIELD (494): *Meltham* (2) -	1st July	Meltham Sub-district - 7,092	The two sub-districts of *Meltham* and *Honley* were united for Registration purposes, and to form one Registrar's Sub-district, viz. "*Honley*" Sub-district (2).
Honley (3) -	„	Honley Sub-district - 5,998	

NOTE.—In the various Tables of Abstracts given in this Report, the area and population are stated for the above Districts according to the alterations here indicated.

* The *Registration or Union Counties* consist of groups of Superintendent Registrars' Districts which are generally co-extensive with the Poor Law Unions. Those Districts which extend into two or more Counties (proper) are included entirely in that County in which the principal town of the District, or the greater part of the population, is located. The boundaries of Registration Counties therefore differ more or less from the boundaries of Counties (proper).

† These areas were furnished to the Registrar General by the Ordnance Survey Department for the purposes of the Census of 1871. They do not include space occupied by foreshore or tidal water of rivers and creeks.

‡ Where the parties to a marriage are of different religious persuasions it sometimes happens that the ceremony is performed according to the rites of both persuasions; in these cases the two ceremonies are entered as two marriages. This column also includes 107 cases of marriage after divorce, see Table 12, page lxv.

* The parishes which formed the district of Presteigne (607) were, on its dissolution, added to the Superintendent Registrars' Districts of Kington (343) and Knighton (608) on the 1st July 1877.

† At the end of the year 1878, the number of Superintendent Registrars' Districts was 631. The numerical arrangement, 1 to 627 was adopted on 1st January 1871. *Six* new Superintendent Registrars' Districts, viz., Fulham (1*a*), Prestwich (467*a*), Barrow-in-Furness (481*a*), Middlesbrough (532*a*), Lanchester (546), and Pontardawe (587*a*), have been *constituted* since 1871; and *two* Superintendent Registrars' Districts have been *dissolved*, viz., Shrewsbury (352), which has been *incorporated with* Atcham (351), and the parishes forming the District of Presteigne (607) have been added to the Superintendent Registrars' Districts of Kington (343), and Knighton (608).

Ages of 299,794 Persons who were married in England in the Year 1878.

The Total Number of Marriages registered in England in the Year 1878 was 190,054; the Ages of *both* Parties were specified in 149,897 instances. In the other 40,157 cases the column of the Register headed "Ages" is unfortunately filled in by the Officiating Minister or by the Registrar of Marriages with the words "of full Age," "Minor," "Under Age," as the case may be.

Ages of 149,897 Men and 149,897 Women married in England in the Year 1878.

* The *Registration Counties* consist of groups of Superintendent Registrars' Districts, which are generally co-extensive with the Poor Law Unions. Those Districts which extend into two or more Counties (proper) are included entirely in that County in which the principal town of the District, or the greater part of the population, is located. The boundaries of the Registration Counties therefore differ more or less from the boundaries of the Counties (proper).

† These areas were furnished to the Registrar General by the Ordnance Survey Department for the purposes of the Census of 1871. They do not include space occupied by foreshore or tidal water of rivers and creeks.

MARRIAGES, BIRTHS, and DEATHS registered in the Year 1878—*continued.*

* The *Superintendent Registrars' Districts* (631 in number at the end of the year 1878) are collections of contiguous Parishes or Places combined for purposes connected with the Registration of Births, Deaths, and Marriages, and are nearly always identical with the Poor Law Unions of the same names; they are arranged according to their local position under the Registration Counties. The presence of Institutions in any District is indicated in this column of the Table by *H* for Hospital or Infirmary, *L* for Lunatic Asylum, and *w* for Workhouse Establishment receiving inmates from other Districts than the one in which it stands; and repetitions of these letters show the number of such Institutions in any District.

† Wherever the minus sign is prefixed to the number in the column headed "Excess of Births over Deaths," it denotes that the Births in the District, instead of exceeding the Deaths, were, in fact, *less than the Deaths* to the extent stated.

* The Sub-districts (2183 in number at the end of the year 1878) are sub-divisions of Districts, and comprise the Parishes or Places in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter *W* denotes that the Sub-district contains within its limits a Workhouse Establishment belonging to the District or Union; *w* indicates that a Workhouse Establishment receiving inmates from other Districts than the one in which it stands is included; *H* indicates a Hospital or Infirmary; *L* a Lunatic Asylum; and repetitions of any of these letters show the number of such Institutions in each Registration Sub-district.

† Wherever the minus sign (−) is prefixed to the numbers given in the Column headed "Excess of Births over Deaths," it denotes that the Births in the Sub-district, instead of exceeding the Deaths, were, in fact, *less than the Deaths* to the extent stated. The Excess of *Deaths* over Births is often attributable to the mortality in Institutions. The Deaths in the principal Institutions of England in 1878 are given on pages 99-120.

‡ 11 : 1.—See Table 87, page cxxviii.

DEATHS IN PUBLIC INSTITUTIONS,

1878.

The following pages contain the numbers of deaths registered during 1878 in most of the Public Institutions of England. These figures afford the means of correcting the mortality of districts and sub-districts in which Public Institutions are situated. The list includes Workhouses, Hospitals, Infirmaries, and Public Lunatic Asylums, while Prisons, Almshouses, Schools, Private Lunatic Asylums and Benevolent Asylums, are excluded. The list, as settled, includes 1459 Institutions; of which 718 are Workhouses, Workhouse Infirmaries, or Workhouse Schools; 658 Hospitals or Infirmaries; and 83 Lunatic Asylums. The Lunatic Asylums are mostly County Asylums, but a few private Asylums which receive pauper patients are also included. In these 1459 Institutions 51,425 deaths were registered during the year, or 9·5 per cent. of the total deaths in England and Wales, against 9·1 and 9·9 per cent. in the two preceding years; 33,534 occurred in Workhouses, 13,136 in Hospitals, and 4755 in Lunatic Asylums. Each of these totals exceeded the corresponding number in 1877, and the proportion to total deaths was 6·2 per cent. in Workhouses, 2·4 in Hospitals, and 0·9 in Lunatic Asylums.

Information relating to the deaths recorded in many Private Lunatic Asylums, and Charitable Institutions, will be found in the notes to the following pages.

NOTE.—The Table may be read thus: Of the 278,772 deaths of Males, 75,659 were those of children under 1 year of age; 24,342 those of the age 1 and under 2 years; 9,918 of the age 5 and under 10 years; 5,932 of the age 15 and under 20 years, and so on.

* This column includes the deaths of 24 males registered as aged 100 years and upwards; namely, 12 aged 100, 5 aged 101, 2 aged 102, 3 aged 103, one aged 104 years, and one aged 105 years. The districts in which these deaths occurred and the cause of death in each case are stated in Table 33, page lxxxvi, of Report.

The *Causes of Death* in England and in London, in combination with the Ages at Death, are given at pp. 146-161.

1878.

CAUSES OF DEATH AT DIFFERENT AGES IN ENGLAND AND LONDON.

CAUSES OF DEATH IN DIVISIONS AND COUNTIES.

DEATHS FROM SEVERAL CAUSES IN DIVISIONS, COUNTIES, AND DISTRICTS.

VIOLENT DEATHS.

The principles upon which the Causes of Death are tabled have been explained in previous Annual Reports. It will be sufficient to state now that all diseases are classified in the following and in similar Tables of Causes of Death under 116 heads; some of these heads, however, include groups of diseases which are very distinct from one another, but which either are fatal to only a *few persons*, or are often confounded with other diseases. The rule has been to refer the distinct diseases to analogous heads under which the cases were so numerous, that the additional numbers of diseases really distinct would not materially interfere with the calculated proportions. The Table for England and Wales (pp. 146–155) gives printed *in Italics* the other causes of death bracketed with the heads limited to 116 in the condensed Tables. It will be noticed, for example, that in the class of Local Diseases—such as diseases of the organs of circulation for the sake of brevity designated "Heart Disease,"—in a certain number of instances the precise nature of the malady is given, in other instances all that is recorded is the disease of the organs without any further distinction.

LETTER to the REGISTRAR GENERAL on the CAUSES OF DEATH in ENGLAND in 1878, by WILLIAM FARR, Esq., C.B., M. D., F.R.S. . . .	225
TABLES (MISCELLANEOUS)	248
TABLE of CAUSES OF DEATH in ENGLAND in 1878, classified in accordance with the NOMENCLATURE drawn up by a COMMITTEE appointed by the ROYAL COLLEGE OF PHYSICIANS OF LONDON . . .	259

APPENDIX.

Letter to the Registrar General on the Causes of Death in England and Wales, by W. Farr, Esq., C.B., M.D., F.R.S.

Year 1878.

Sir,

The following presents a summary view of the deaths from five classes of causes in the year 1878:—

		Mortality to 1,000,000 persons living.
Total deaths - -	539,872	21,721
Classes.		
I. Zymotic diseases - -	105,985	4278
II. Constitutional diseases -	91,874	3708
III. Local diseases - -	244,010	9848
IV. Developmental diseases -	74,975	3026
V. Violent deaths - -	18,847	761
Sudden deaths (cause not ascertained).	2,498	100
Causes not specified -	1,683	—

There was a diminished mortality in the year 1877 from zymotic disease which had the effect of diminishing mortality generally: in 1878 the mortality from zymotic disease increased so that it was higher than it had been since 1875. The diseases of this class the most fatal in 1878 were diarrhœa (24,462), scarlet fever (18,842), whooping-cough (17,784), measles (7765), enteric fever (7652), croup (4061), diphtheria (3498), rheumatism (3420). The mortality from small-pox was lower than in 1877. Enthetic disease was fatal to 2513 persons; syphilis is much more fatal than it was twenty years ago. Hydrophobia caused the deaths of 50 persons or 29 less than in 1877, in which year the deaths from this cause attained the highest number on record, 79. The deaths from hydrophobia ranged from 1 to 12 in the years 1862 to 1864, from 19 in 1865 to 56 in 1871, from 47 in 1875 to 79 in 1877, and in 1878 the number was 50. There were only 7 deaths from glanders. The total deaths from delirium tremens and intemperance were 792 in the year 1851, and 1116 in the year 1878.

Gout was fatal to 214 persons in 1851 and to 593 in 1878. Cancer was fatal to 5218 in 1851 and to 12,664 in 1878; the average annual mortality during the five years 1850–4 was 302 in one million living, in the five years 1870–4 it was 443, while in the year 1878 the rate was 512: thus the mortality from cancer has increased year by year since 1851. It is a malignant disease, slow in its progress but surely fatal. Tubercular disease killed 73,549 persons including 52,856 by phthisis.

Local diseases were the most fatal, causing the death of 244,010 persons, including 70,094 by diseases of the nervous system, 35,482 by diseases of the organs of circulation, and 96,784 by diseases of the respiratory system (of bronchitis 60,742 persons died; of pneumonia 24,763). Of diseases of the digestive organs 25,075 persons died, including 10,482 of hepatitis,

jaundice, and liver diseases. 10,559 persons died of urinary disease, including 4801 by nephria, 1057 by diabetes, to which the number has increased from 403 in 1851. By ovarian dropsy the deaths were 367, to which the deaths increased from 196 in 1851.

By premature births 12,002 infants died. The number of deaths by childbirth and metria were 3300, or 3·7 to 1000 children born alive. The number of deaths ascribed to old age was 27,483; to atrophy and debility 26,658.

The number of violent deaths in the aggregate was 18,847; including 16,694 through accident or negligence, of which 7070 were from fractures and contusions, 102 from gunshot wounds, 129 from cuts and stabs, 2617 from burns and scalds, 350 from poison, 3659 from drowning, 1759 from suffocation, and 1008 otherwise. Of the suicides, 109 were by gunshot wounds, 320 by cuts and stabs, 215 by poison, 369 by drowning, 606 by hanging, 145 by other means or means not specified. 374 deaths were by homicide; and 15 persons were executed, whereas the number in 1871 was only 4. The number of violent deaths in the aggregate to 1,000,000 persons living was 772 in 1863 and 761 in 1878. In the sixteen years 1863–78 the number of suicides to 1,000,000 persons living increased from 66 to 71; the number of homicides decreased from 20 to 15. The number of executions remains nearly stationary, viz., one in 1,000,000 persons living.

I have the honour to be,
Sir,
Your very obedient Servant,

WILLIAM FARR.

To
The Registrar General.

APPENDIX TABLES,

1878.

NOTE.—For the causes of death in the 5 years 1838–42, and the 4 years 1847–50, see Table 7 in the Appendix to the Thirty-fourth Annua Report. The causes of death were not abstracted for the 4 years 1843–46.

* Deaths from violence were not classified according to orders prior to 1858. All deaths from violence are classified to Order I. (Acciden or Negligence), unless they are specially ascribed to homicide, suicide, or execution. Order 2, comprising violent deaths in battle, is inap plicable to the civil population.

† The numbers of persons executed in the several years will not necessarily correspond with those returned for the same years in th "Criminal Returns," inasmuch as the executions therein recorded in each year are classed according to the *dates of conviction*, whil the numbers in this Table are placed under the years in which the deaths are *registered*.

n each of the **28 Years 1851–1878.**

‡ The cases of angina membranacea were included with scarlet fever until 1860; for several years prior to that date they were, however, separately distinguished by a marginal note on the ticking sheet, as they have been since 1860, when they were first classed to Diphtheria.

§ Included with scarlet fever until 1855.

TABLE 1. (*continued.*)—**Causes of Death registered**

Class.	CAUSES OF DEATH.	1851	1852	1853	1854	1855	1856	1857	1858	1859	1860	1861	1862	1863	186
	9 Erysipelas	1,998	2,075	1,812	1,937	2,245	2,125	1,573	2,026	1,954	1,665	1,542	1,523	1,920	2,10
	10 Puerperal Fever (Metria)	1,009	972	795	954	1,079	1,067	836	1,068	1,238	987	886	940	1,155	1,48
	11 Carbuncle	161	233	252	300	255	253	252	246	236	247	193	206	237	26
	12 Influenza	2,152	1,359	1,789	1,061	3,568	1,029	1,393	1,794	1,112	1,130	746	915	919	80
	13 Dysentery	2,185	2,756	1,891	1,943	1,437	1,335	1,698	1,478	1,379	1,156	1,416	1,044	1,051	1,00
	14 Diarrhœa	14,728	17,617	14,192	20,052	12,770	13,815	21,189	13,853	18,331	9,702	18,746	11,112	14,943	16,43
	15 Cholera	1,132	1,381	4,419	20,097	837	762	1,150	673	887	327	837	511	807	93
	16 Ague	167	151	183	192	149	124	195	207	233	203	149	150	141	11
	17 Remittent Fever	607	666	707	646	575	162	270	569	400	314	254	284	198	20
	18 Rheumatism	1,785	1,930	1,895	1,811	2,170	2,007	1,688	1,942	2,124	1,998	1,982	1,943	2,175	2,55
	19 Other Zymotic Diseases	–	–	–	–	–	–	–	–	–	110	116	105	114	15
	ORDER 2.														
	1 Syphilis	598	623	622	964	947	879	957	1,006	1,089	1,067	1,177	1245	1,386	1,55
	2 Stricture of Urethra	244	251	241	256	218	177	184	186	177	178	168	199	183	22
	3 Hydrophobia	25	15	11	16	14	5	3	2	4	3	4	1	4	1
	4 Glanders	*	*	*	*	11	8	3	1	3	4	6	4	5	2
	ORDER 3.														
	1 Privation	58	54	78	87	91	69	52	62	52	68	63	73	54	10
	2 Want of Breast-milk	553	593	632	742	850	704	829	997	1,017	1,002	970	1006	1,158	1,25
	3 Purpura and Scurvy	248	234	266	282	324	227	246	341	342	361	405	353	409	39
	4 Alcoholism — *a* Del. Trem.	503	487	508	551	536	451	484	424	545	457	415	471	471	59
	4 Alcoholism — *b* Intemp.	289	308	373	318	286	237	294	288	345	318	242	246	364	46
	ORDER 4.														
	1 Thrush	1,175	1,237	1,202	1,190	1,149	1,094	1,170	1,236	1,217	920	1,055	904	961	1,00
	2 Worms, &c.	130	126	116	117	231	254	116	150	155	167	157	156	198	16
II.	**ORDER 1.**														
	1 Gout	214	218	217	246	287	260	223	245	238	268	247	284	248	30
	2 Dropsy	9,873	9,788	10,302	9,396	9,362	8,213	8,452	8,758	8,119	7,823	7,301	7,247	7,414	7,38

* From 1851 to 1857, inclusive, premature birth and infantile debility were abstracted together. In order, therefore, to establish something like uniformity in the above Table, the numbers for these separate headings have been estimated from the proportions which the separate numbers bore to the sum of the two in subsequent years, when they were separately classified.

† See note referring to classification of deaths from violence on page 228.

In **England** in each of the **28 Years 1851–1878.**

	CAUSES NOT CLASSIFIED OR DISTRIBUTED.	‡60·8	214·8	89·2	—	—	—	—	—	—	—

* The rates given in this Table for the various groups of years are the means of the calculated rates in the several years. Under some of the separate headings the means cannot be given for the entire period, as the classification in full detail has not been made during the whole 25 years. In a certain number of cases in each year the cause of death is not stated; in calculating the proportional numbers since 1858 these have been distributed rateably over all the specified causes in the Table.

† See note referring to the classification of deaths from violence on page 228.

‡ Average in 10 years.

TABLE 4.* (*continued.*)—**Mean Annual Rate** of **Mortality** in **England** from each CLASS of CAUSES and from each CAUSE of DEATH during the **25 Years 1850–74,** and in each **Quinquenniad** of that Period; also the **Rate** of **Mortality** in the Years **1875, 1876, 1877,** and **1878.**

* The populations of these counties have been estimated to the middle of 1878 on the assumption that the rate of increase or decrease that prevailed between the two census enumerations in 1861 and 1871 was maintained up to the middle of 1878. The county totals have been adjusted in order to cast to the estimated total population of England and Wales.

INDEX OF DISTRICTS.

[The following Index furnishes a reference to the *Number* of each Registration District in the topographical arrangement adopted in the Tables of Abstracts contained in the Report. The alphabetical arrangement places compound names in the order in which they are pronounced: thus, East Ashford will be found under the letter E, and *not* under A.]

In consequence of numerous alterations (amalgamations of districts and formations of new districts) since the numerical arrangement, 1 to 623, was adopted in the Abstracts for the year 1847, the districts were re-numbered consecutively from 1 to 627 in the Abstracts for the year 1871.*

For names of Towns, such as Leamington, Torquay, &c., which are not found in this "Index of Districts," see the "Index of Sub-districts" (page 269) *and "Index of certain Towns"* (page 279).

INDEX OF SUB-DISTRICTS.

[This alphabetical arrangement places the Registration Sub-Districts (or Registrars' Districts) having *compound names* in the order indicated by the usual pronunciation of those names; thus, East Grinstead will be found under the letter E, and not under G; St. James under the letter S, and not as "James, St." The number against each Sub-District, in the third column, refers to its numerical place in the Tables of Abstracts; thus, Abbey Holme (570; 2) is the 2d Sub-District of the Wigton District, No. 570.]

Sub-District.	District.	No.
A		
Abbey	Bath	317; 3
Abbey Holme	Wigton	570; 2
Abbots Bromley	Uttoxeter	367; 2
Abbotsbury	Weymouth	264; 4
